Latest Version

We are constantly reviewing our products. New material is added and old material is revised. Free updates are available for 90 days after the purchase. You should check your member zone at VisualExams and update 3-4 days before the scheduled exam date.

Here is the procedure to get the latest version:

1. Go to <http://www.visual exams.com/>
2. Log in the **User Center**
3. The latest versions of all purchased products are downloadable from here. Just click the links.

Feedback

If you spot a possible improvement then please let us know. We always interested in improving product quality.

Feedback should be send to Visual exams@hotmail.com. You should include the following: Exam number, version, page number, question number, and your login Account.

Our experts will answer your mail promptly.

Explanations

This product does not include explanations at the moment. If you are interested in providing explanations for this exam, please contact Visual exams@hotmail.com.

Features

- Comprehensive questions with complete details
- Instant Downloadable in PDF form.
- Verified Answers Researched by Industry Experts
- Questions accompanied by exhibits.
- Drag and Drop questions as experienced in the Actual Exams.
- These questions and answers are backed by our GUARANTEE.
- Questions updated on regular basis.
- Like actual certification exams our product is in multiple-choice questions (MCQs)

Commitment to Your Success: At VisualTestExam.com, we are committed to your ongoing success. Our exams and questions are constantly being updated and compared to industry standards.

Want to earn a Microsoft certification like MCSE, MCSE 2003, CCNA, CCNP? Thinking about getting an A+ or CCSP?

A, CCSP or Network+ Certification with less effort and time. You will be astonished at the theoretical and practical knowledge you will acquire in such a short period of time using our Certification Training Products. Our Study material will enable you to pass your Microsoft, Your Cisco and any other certification on the very first attempt.

Guarantee

VisualExams provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if somehow you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

1. In security solution design development, when do you document the business and IT organizational structure map?

- A. when establishing the customer's baseline for planning purposes
- B. when identifying opportunities for business partner security offerings
- C. when evaluating the customer's IT processes, people and technologies
- D. when defining a long-term vision for the future direction of the customer's security solutions

Answer: A

2. Which specification has completed the OASIS standardization process as of July, 2008?

- A. WS-Policy
- B. WS-Security
- C. WS-Federation
- D. WS-SecureConversation

Answer: B

3. A current IBM Tivoli security customer is very satisfied with their current IBM Tivoli Identity Manager (ITIM) and IBM Tivoli Access Manager (ITAM) implementations. The customer has benefited greatly from the user management and provisioning, authentication, authorization and Web single sign-on processes now in place.

The customer sees the value of Web services and wants to leverage their business partnerships to greatly expand their online services, for a relatively small investment. They are expecting that their existing ITIM and ITAM investments can simply be stretched to include these business-to-business (B2B) flows.

IBM Tivoli Federated Identity Manager should be added to this scenario to address which security requirement?

- A. the blocking of threats that might otherwise cross enterprise boundaries
- B. the handling of potentially millions of users, which neither ITIM nor ITAM was built to address
- C. the integration with firewalls that control security between any two businesses involved in these B2B flows
- D. the handling of multiple types of standards-based protocols and user tokens that need to be passed between participating businesses

Answer: D

4. Which network client software collects policy data from collectors and summarizes this data to provide its version information and the number of policy violations that form the posture credentials to the CISCO Trust Agent client software?

- A. CISCO Access Control Server
- B. CISCO Trust Agent running on the network client system
- C. Remediation Manager client running on the network client system
- D. Tivoli Security Compliance Manager client running on the network client system

Answer: D

5. Which tasks need to be accomplished during an initial meeting with the customer when reviewing a company organizational chart?

- A. determine the products to be used and provide Proof of Concept of the products in the solution
- B. document the key players and their roles and provide Proof of Concept of the products in the solution
- C. identify key decision makers and determine the products to be used
- D. identify key decision makers and document the key players and their roles

Answer: D

6. Which tasks need to be accomplished during an initial meeting with the customer when reviewing a company organizational chart?

- A. identify key decision makers and document the key players and their roles
- B. identify key decision makers and provide a detailed analysis of the current customer configuration
- C. determine which products are to be used and document the key players and their roles
- D. determine which products are to be used and identify key decision makers

Answer: A

7. You meet with the customer and compile the following list concerning security:

- customers business requirements

- immediate business/security needs
- customers long-term business/security vision
- customers stated security requirements

What should also be included in this list?

- A.list of products to be deployed
- B.government security standards
- C.existing change control processes
- D.companys complete organizational chart

Answer: B

8. In order to correctly understand the data protection requirements, which two groups of people must be interviewed? (Choose two.)

- A.all managers
- B.IT department personnel
- C.Business Unit management
- D.Legal department personnel
- E.Human Resource department

Answer: CD

9. Which two business goals are accomplished through the implementation of a successful automated security management process? (Choose two.)

- A.increase data availability
- B.increase data duplication
- C.reduce impact of threats
- D.eliminate any risk of frauds
- E.reduce Total Cost of Ownership (TCO) for account management

Answer: CE

10. What needs to be defined for the Identity Management aspect of a Security Solution?

- A.processes

- B.driver's licenses
- C.password selection
- D.employee pay bands

Answer: A

11. What is the purpose of the context diagram for a security solution?

- A.It provides a detailed listing of the software used in the solution and how the software is connected.
- B.It provides a detailed listing of the hardware used in the solution and how the hardware is connected.
- C.It scopes the security system's responsibilities and provides a black box view of the system interface.
- D.It provides a listing of the hardware and software used in the system and how they are interconnected.

Answer: C

12. Who must approve a requirements specification?

- A.the customer and the sales team
- B.the customer and the implementation team
- C.the implementation team and the sales team
- D.the implementation team and the product support team

Answer: B

13. Which document describes what needs to be addressed in a security solution for a customer?

- A.Installation History
- B.Design Specification
- C.Interface Specification
- D.Requirements Specification

Answer: D

14. Business Rules catalogs are effective in gathering requirements for what items?

- A.user registry layout
- B.password strength policies
- C.user interaction with the system

D.administrator interaction with the system

Answer: B

15. A customer has resources being managed in different facilities.

When configuring a security solution, what is the most important element to consider in the design of the system?

- A.use of a fiber optic backbone
- B.the encryption protocol to be used
- C.location of firewalls in the internal network
- D.the time zone in which each facility is located

Answer: C

16. What is the most common impediment to designing an automated security solution?

- A.an unreliable connection to remote systems
- B.too many firewalls between managed systems
- C.an application interface that is unavailable on managed systems
- D.nonstandard encryption protocols used for secure communications

Answer: C

17. Which programming languages need to be available to manage an unsupported operating system with an IBM Tivoli Identity Manager adapter?

- A.Java and C
- B.Cobol and REXX
- C.C++ and Javascript
- D.Visual Basic and C#

Answer: A

18. The following information is important when creating a diagram of a customers organization:

- divisions
- location(s) / geographical information

- reporting chains

What additional information is important to have when creating this diagram?

- A.business units
- B.email addresses
- C.Help Desk functions
- D.whether or not the customer has a dedicated operations center

Answer: A

19. What information is needed when creating a document concerning a customer's IT and business organizational structure? (Choose two.)

- A.number of business units
- B.annual expenditure on IT assets
- C.number of employees in IT organization
- D.list of divisions within the IT department
- E.total number of systems used by the company

Answer: AD

20. What is the objective of documenting the business and IT organizational structure of a company?

- A.It helps the solution advisor identify the number of products that need to be deployed.
- B.This step is essential to identify key areas of the business processes that relate to security.
- C.It indicates the approximate number of licenses required for each product the company purchases.
- D.The business organizational structure must match certain specifications for the product to be usable.

Answer: B
