11. Which statement is true about the Users and Custodians functionality?

A.Users and Custodians can be created for Assets. A User is someone who uses the Asset. A Custodian is someone responsible for the care of the Asset. For each person entered, the User field, the Custodian field or both must be checked. One person can be nominated as the Primary Contact for the Asset.

B.Users and Custodians can be created for Assets and Locations. A User is someone who uses the Asset or Location. A Custodian is someone responsible for the care of the Asset or Location. For each person entered, either the User field or the Custodian field or both fields must be checked. One person can be nominated as the Primary Contact for the Asset or Location.

C.User and Custodians can be created for Assets, Locations and Configuration Items (CIs). The dialog box has a table window for creating Users and Custodians and another for creating Primary Contacts who are used for communicating information about the Asset, Location or CI by email or bulletin board. A person can be a user or a custodian, or both a user and a custodian.

D.Users and Custodians can be created for Assets and Locations. A User is someone who uses the Asset. A Custodian is someone responsible for the care of the Asset. The Primary Contact is used for communicating information about the Asset or Location by email or bulletin board. These three fields act like a radio button, only one of them can be checked on each person record.
