- A. Lower cost
- B. Installations in many different countries
- C. High skill level in the customer technical personnel
- D. Integration of third party hardware and software solutions

**Answer: D**

7. A customer is interested in the IBM eServer BladeCenter. The price of the blade technology seems high when compared to other smaller rack servers. Which of the following is the best way to address the apparent price variance?

A. Explain that the density of the BladeCenter is very valuable. Having the ability to put 84 servers in a 42U rack provides better

Return on Investment.

B. Explain that the BladeCenter is an infrastructure component and includes most of the switches, cables, power and high

availability items that would need to be purchased separately in the case of other rack mount servers.

C. Explain that the number of processors in the Blade Solution exceeds that available in a stand-alone server solution. This

processor density allows for better memory density and more processing power per unit of floorspace.

D. Explain that the systems management programs in the BladeCenter allow for better deployment savings. Being able to quickly

install and configure new servers improves the Total Cost of Ownership over the life of the technology.
