1. Which is a key benefit of the IBM System Storage N series Write Anywhere File Layout (WAFL) design and is the main contributor to better performance?

- A. The copy-on-write feature allows WAFL to avoid duplicating blocks of data, thus increasing performance.
- B. The file placement algorithms in WAFL allow the repair of high file fragmentation concurrently.
- C. Keeping metadata in files makes it easy to increase the size of the file system on the fly. When a new disk is added, the N series automatically increases the size of the metadata files.

- B. Site B host ACLs must be updated for the failed-over Windows connections.
- C. The windows users must re-establish shares using Site B addresses and hostnames.
