

Exam : IBM 000-341

**Title : WebSphere Application
Server V5.0, Multiplatform
Administration**

Version : Demo

Important Note, Please Read Carefully

Other VisualExams products

[All visual exams IT Exam Products](#)

Our products of Offline Testing Engine

Use the offline Testing engine product to practice the questions in an exam environment.

Build a foundation of knowledge which will be useful also after passing the exam.

[visual exams Testing Engine](#)

Latest Version

We are constantly reviewing our products. New material is added and old material is revised. Free updates are available for 90 days after the purchase. You should check your member zone at VisualExams and update 3-4 days before the scheduled exam date.

Here is the procedure to get the latest version:

1. Go to <http://www.visual exams.com/>
2. Log in the **User Center**
3. The latest versions of all purchased products are downloadable from here. Just click the links.

Feedback

If you spot a possible improvement then please let us know. We always interested in improving product quality.

Feedback should be send to Visual exams@hotmail.com. You should include the following: Exam number, version, page number, question number, and your login Account.

Our experts will answer your mail promptly.

Explanations

This product does not include explanations at the moment. If you are interested in providing explanations for this exam, please contact Visual exams@hotmail.com.

Features

- Comprehensive questions with complete details
- Instant Downloadable in PDF form.
- Verified Answers Researched by Industry Experts
- Questions accompanied by exhibits.
- Drag and Drop questions as experienced in the Actual Exams.
- These questions and answers are backed by our GUARANTEE.
- Questions updated on regular basis.
- Like actual certification exams our product is in multiple-choice questions (MCQs)

Commitment to Your Success: At VisualTestExam.com, we are committed to you ongoing success. Our exams and questions are constantly being updated and compared to industry standards.

Want to earn a Microsoft certification like MCSE, MCSE 2003, CCNA, CCNP? Thinking about getting an A+ or CCSP?

A, CCSP or Network+ Certification with less effort and time. You will be astonished at the theoretical and practical knowledge you will acquire in such a short period of time using our Certification Training Products. Our Study material will enable you to pass your Microsoft, Your Cisco and any other certification on the very first attempt.

Guarantee

VisualExams provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if somehow you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

1. Upon monitoring an application it is found that the passivation and activation counters for EJBs are extremely high. What is the BEST change to be made to the server configuration to improve EJB subsystem performance?

- A. Increase the JVM heap size
- B. Increase the EJB cache size
- C. Increase the EJB cache cleanup interval
- D. Increase the maximum ORB service connector cache size

Answer: B

2. A Web application is suspected to have a (concurrent access) synchronization problem. Which PMI modules should be monitored to try and isolate the performance problem?

- A. Dynamic cache
- B. J2C connectors
- C. Web applications
- D. JVM runtime
- E. Web container thread pools

Answer: CE

3. A high volume application in a clustered environment uses only local sessions. Occasionally a request having session affinity is routed to an alternative application server. This happens even when the application server with affinity does not fail. What is the most likely contributing factor?

- A. The session time-out value is set too high
- B. The session cache size is configured to be too small.
- C. The web container thread pool for the application is too small on each server.
- D. It is the nature of session affinity with local only sessions.

Answer: C

4. What should an administrator guarantee to ensure that the following command performs as expected when run on the deployment manager node? `backupConfig cellBackup-nostop`

- A. All application code must be present on the deployment manager node.
- B. No configuration changes should be made while the command executes.
- C. The command should be preceded by a `syncNode` Command from the deployment manager node.
- D. The file `cellBackup` does not already exist.

Answer: B

5. Concurrent access to `HttpSession` objects is possible in a certain application. The BEST approach for the system administrator to make this behavior safe involves:

- A. Checking the `allowSerialAccess` session management property for the installed enterprise application.

- B. Checking the `Allow serial access` session management property for the application server on which the application is installed.
- C. Checking the `Allow overflow` session management property for the installed enterprise application.
- D. Having the developer mark all application methods that access the session as synchronized.

Answer: A

6. An enterprise application has an execution profile where 50% of the HTTP requests hit the EJB layer. Which pair of application server settings best fit this application profile?

- I. Maximum web container thread pool size = 25
- II. Maximum web container thread pool size = 50
- III. Maximum ORB service thread pool size = 25
- IV. Maximum ORB service thread pool size = 50
- V. Maximum EJB cache size = 25
- VI. Maximum EJB cache size = 50

- A. I and IV
- B. I and III
- C. II and III
- D. II and V
- E. III and VI

Answer: C

7. Which of the following manual tasks may need to be carried out before distributing `plugin-cfg.xml` to web server machines?

- A. Edit `plugin-cfg.xml` Virtual Host names to coincide with the virtual host names defined within the corresponding web server.
- B. Edit `plugin-cfg.xml` absolute file paths to reflect the web server's local filesystem.
- C. Generate the keyring and stashfile if using SSL between the plug-in and application servers.
- D. Update the domain suffix for each virtual host in `plugin-cfg.xml`.

Answer: BC

8. During a stress test on an application, it was found that there was a large number of prepared statement discards associated with one Datasource. All other metrics were within expected range. The BEST way to increase performance of this application is to make what change to the Datasource properties?

- A. Increase the statement cache size.
- B. Increase the minimum connections.
- C. Increase the maximum connections.
- D. Change the purge policy to `Entire Pool`.

Answer: A

9. An application server is closing HTTP connections prematurely. Assuming that MaxKeepAliveConnections is already set at 90% of the maximum number of threads in the Web container thread pool, what Web container setting should be modified to improve this situation?

- A. Set the MaxKeepAliveRequests property to a sufficient value.
- B. Set the MaxKeepAliveConnections property to a sufficient value.
- C. Increase the Web container thread pool maximum size.
- D. Increase the ORB service thread pool maximum size.

Answer: A

10. What would be the practical considerations for creating multiple smaller application servers each running one different web application rather than a single large application server for an application architecture?

- A. The aggregated plug-in config file will contain less complex URIs.
- B. Multiple smaller servers provide better application isolation.
- C. There will be a decrease in response time due to interprocess RMI/IIOP calls.
- D. Multiple smaller servers eliminate single points of failure.

Answer: B

11. In which topologies would an administrator configure the use of LTPA (Lightweight Third Party Authentication) with the Local OS user registry?

- A. Single node configured with multiple application servers.
- B. A configuration in which multiple authentication mechanisms are used for a security domain.
- C. Distributed environment which shares a domain user registry.
- D. Multiple nodes configured with multiple clusters.

Answer: AC

12. In a typical Web application request/response information flow, which WebSphere Application Server V5.0 component can initially encrypt the request?

- A. Web container's embedded HTTP server
- B. Web server plug-in
- C. EJS Server
- D. Web browser
- E. Application server

Answer: B

13. When federating a node into a cell how would an administrator add an application installed on that node into the cell?

- A. Use the addNode utility without the `-includeApps` option and install the application on the node.

- B. Use the addNode utility without the ?\$CsyncNode option and copy the application binaries to the node.
- C. Use the addNode utility with the ?\$CincludeApps options and configure the synchronization options on Admin Console.
- D. Use the addNode utility with the ?\$CsyncNode option and copy the application binaries to the node.

Answer: C

14. What is affected in a topology which splits the Web and EJB containers so that they run in separate application servers, each in a different machine?

- A. The elimination of network latency due to JVM optimizations
- B. The elimination of a single point of failure
- C. Performance improvement due to greater number of inter-process calls
- D. Increased maintenance costs due to additional machines

15. In a Network Deployment environment, what are the consequences of a node agent failure?

- A. Application server cannot be started, using the admin console, until the node agent is restarted.
- B. The local configuration may not broadcast changes to the mater configuration.
- C. The deployment manager??s file transfer service is made unavailable to all node agents in the cell.
- D. The administrative console is made unavailable.
- E. The local configuration may not reflect the master configuration.

Answer: AE

16. What should be considered when comparing the horizontal scaling of an application server (clustering) versus creating multiple stand-alone (Base) servers on multiple machines?

- A. File synchronization will occur in the clustered environment.
- B. Multiple stand-alone servers on multiple machines provide failover support.
- C. The HTTP server plug-in distributes requests in multiple stand-alone server environments.
- D. The HTTP server plug-in distributes requests in a clustered environment.
- E. Multiple stand-alone servers on multiple machines can be easily combined into the horizontally scaled environment.

Answer: AD

17. Where can an administrator locate configuration data for a standalone WebSphere Application Server V5.0 installation?

- A. Administrative Repository on the database server
- B. Master configuration repository on the cell configuration repository on the deployment manager
- C. Configuration repository on the local machine
- D. Cloudscape database on the local machine

Answer: C

18. Which of the following is a reason why a configured binding would be necessary?

- A. Allow federation of CORBA name spaces to the node??s name space
- B. Bind DataStore JNDI names explicitly at the node name server level
- C. Configure an alias for a JNDI name in the system??s partition of the name space
- D. Provide interoperability with IBM WebSphere Application Server V4 clients

Answer: D

19. An administrator has created a Version 5 data source, and has selected the option to use this data source in container managed persistence. Which of the following CANNOT use this data source?

- A. JDBC applications and servlet 2.3 components
- B. CMP EJB 1.x beans with a J2EE 1.3 deployment descriptor
- C. CMP EJB 1. x beans with a J2EE 1.2 deployment descriptor
- D. CMP EJB 2.0 beans
- E. BMP EJB 2.0 Beans

Answer: C

20. If a CMP bean uses a J2C resource adapter to access a backend data store, which of the following should be configured?

- A. CMP Connection Factory
- B. Database connection pool
- C. CMP Resource Environment Provider
- D. User-defined JDBC Provider

Answer: A

Visualexams.com was founded in 2006. The safer,easier way to help you pass any IT Certification exams . We provide high quality IT Certification exams practice questions and answers(Q&A). Especially Adobe, Apple, Citrix, Comptia, EMC, HP, HuaWei, LPI, Nortel, Oracle, SUN, Vmware and so on. And help you pass any IT Certification exams at the first try.
