

Exam : IBM 000-377

**Title : Test 000-377, IBM
WebSphere Application
Server Network
Deployment V7.0, Core
Administration**

Version : Demo

Important Note, Please Read Carefully

Latest Version

We are constantly reviewing our products. New material is added and old material is revised. Free updates are available for 90 days after the purchase. You should check your member zone at VisualExams and update 3-4 days before the scheduled exam date.

Here is the procedure to get the latest version:

1. Go to <http://www.visual exams.com/>
2. Log in the **User Center**
3. The latest versions of all purchased products are downloadable from here. Just click the links.

Feedback

If you spot a possible improvement then please let us know. We always interested in improving product quality.

Feedback should be send to Visual exams@hotmail.com. You should include the following: Exam number, version, page number, question number, and your login Account.

Our experts will answer your mail promptly.

Explanations

This product does not include explanations at the moment. If you are interested in providing explanations for this exam, please contact Visual exams@hotmail.com.

Features

- Comprehensive questions with complete details
- Instant Downloadable in PDF form.
- Verified Answers Researched by Industry Experts
- Questions accompanied by exhibits.
- Drag and Drop questions as experienced in the Actual Exams.
- These questions and answers are backed by our GUARANTEE.
- Questions updated on regular basis.
- Like actual certification exams our product is in multiple-choice questions (MCQs)

Commitment to Your Success: At VisualTestExam.com, we are committed to you ongoing success. Our exams and questions are constantly being updated and compared to industry standards.

Want to earn a Microsoft certification like MCSE, MCSE 2003, CCNA, CCNP? Thinking about getting an A+ or CCSP?

A, CCSP or Network+ Certification with less effort and time. You will be astonished at the theoretical and practical knowledge you will acquire in such a short period of time using our Certification Training Products. Our Study material will enable you to pass your Microsoft, Your Cisco and any other certification on the very first attempt.

Guarantee

Visualexams provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if somehow you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

1. Which of the following is an option given in the First Steps application that runs automatically after installation?

- A. Start the server.
- B. Execute wsadmin.
- C. Configure resources.
- D. Run the Snoop servlet.

Answer: A

2. Which one of the following can be used to instantiate resource adapter classes for establishing and maintaining resource connections?

- A. a data source
- B. connection factories
- C. connection pool settings
- D. a JMS activation specification

Answer: B

3. global security is turned on for a federated cell using a file-based federated repository. The administrator created a new security domain called App1Domain using local operating system registry and mapping it to the application server. The administrator also created a new local operating system user ID App1Admin? Which one of the following is true when the new security domain is enabled to secure Application1?

- A. The administrator can access Application1.
- B. The administrator can disable Application1 security.
- C. App1Admin can disable Application1 security.
- D. App1Admin can access the administrative console.

Answer: B

4. Aside from the administrative console and the addNode command, what other facilities does WebSphere Application Server provide for federating nodes into cells?

- A. wsadmin
- B. The administrative agent

- C. The Profile Management Tool (PMT)
- D. Rational Application Developer Assembly and Deploy Module

Answer: C

5. When backing up WebSphere Application Server configuration and runtime settings, which of the following commands would be relevant?

- A. backupConfig -location location
- B. restoreConfig -profileName profile_name -backupFile backupFile_name
- C. manageprofiles -backupProfile -profileName profile_name -backupFile backupFile_name
- D. wsadmin -backupConfig -profileName profile_name -backupFile backupFile_name

Answer: C

6. What can the system administrator do to distribute incoming HTTP traffic across a farm of Web servers?

- A. Enable server affinity for each HTTP server in the cluster
- B. Implement the Tivoli Access Manager as a load balancer
- C. Implement the caching proxy server component of the Edge Components
- D. Use the Load Balancer component of the Edge Components

Answer: D

7. What is the sequence of components which would typically be involved in the flow of a request from a Web browser to a servlet?

- A. External HTTP Server, HTTP Server Plug-in and EJB Container
- B. Load Balancer, Embedded HTTP Server, HTTP Server Plug-in and Web Container
- C. Edge Component, HTTP Server Plug-in, external HTTP Server, and Web Container
- D. External HTTP Server, HTTP Server Plug-in, embedded HTTP Server and Web Container

Answer: D

8. How could an administrator manage multiple stand-alone application servers on different hosts in a network?

By using:

- A. a job manager which administers multiple application server nodes through administrative agents.
- B. a deployment manager which administers multiple application server nodes through their node agents.
- C. a high availability manager which administers multiple application server nodes through their administrative agents.
- D. an administrative agent which administers multiple application server nodes through their administrative service.

Answer: A

9. Which type of server is recommended to be placed in the demilitarized zone (DMZ)?

- A. Generic servers
- B. Application servers
- C. Managed HTTP servers
- D. Unmanaged HTTP servers

Answer: D

10. What is the advantage of deploying more than one messaging engine and linking them together in a topology that has multiple interconnected service integration buses (SIBus)?

- A. Enable protocol transformation between buses.
- B. Improve the availability of the persistent storage.
- C. Spread messaging workload across multiple servers.
- D. Preserve message ordering through the messaging engines.

Answer: C

11. Why does IBM WebSphere Application Server Network Deployment utilize node groups to implement a distributed environment? To:

- A. segment multiple security domains within a WebSphere cell.
- B. define the logical grouping of application servers to scale horizontally or vertically.
- C. enable mixed nodes with different capabilities within the same cell for administration purposes.
- D. allow application servers having the same applications installed to be grouped logically for workload management.

Answer: C

12. A system administrator wants to improve response time and system load of a Web application running in a clustered environment.

What might the system administrator attempt to decrease the response time of the Web application?

- A. Configure dynamic caching
- B. Enable memory-to-memory replication
- C. Configure session replication to use a database.
- D. Ensure that all cluster members are in the same node group.

Answer: A

13. A system administrator needs to modify the configuration of an enterprise application within a flexible management environment. The system administrator can make the modification using wsadmin scripts by connecting to which of the following components?

- A. Node agent
- B. Job manager
- C. Work manager
- D. Administrative agent
- E. Deployment manager

Answer: BE

14. What would have to be configured in order to implement memory-to-memory HTTP Session persistence?

- A. Dynamic cache service and HTTP plug-in
- B. Synchronization service and embedded Web server
- C. Distributed environment settings in the web containers
- D. Fast Response Cache Accelerator (FRCA) and external Web server

Answer: C

15. When configuring automated transaction peer recovery for recovering in-flight transactions from the

transaction log, what is required from the file system?

- A. RAID disks must be used to host the transaction log
- B. Exclusive read only file locks and the ability to invalidate them
- C. File locking must be disabled for Network File System Version 4 (NFSv4)
- D. Lease-based exclusive locks on files

Answer: D

16. What are the three possible replication types for the dynamic caching service?

- A. Client mode
- B. Server mode
- C. Not shared
- D. Push only
- E. Both push and pull
- F. Broadcast mode

Answer: CDE

17. What is the Data Replication Service (DRS) used for? Please choose three from the following.

- A. Node agents
- B. Web servers
- C. Caching Proxy
- D. Dynamic cache replication
- E. HTTP session persistence and failover
- F. Stateful session EJB persistence and failover

Answer: DEF

18. Which of the following statements most accurately describes the relationship between a flexible management topology and the network deployment cell?

- A. Flexible management can be an alternative to the network deployment cell model.
- B. Flexible management eliminates the need for node agents in a network deployment cell.
- C. The flexible management topology is a replacement for the network deployment cell.

D. The flexible management job manager can perform all the tasks of the deployment manager.

Answer: A

19. In order for a deployment manager to participate in a flexible management environment, which one of the following steps must be completed?

A. Register directly with the job manager.

B. Register with the node agent on the job managers host.

C. Register with an administrative agent on the job managers host

D. First register with a local administrative agent, and then register with the job manager.

Answer: A

20. Which of the following items best gives a reason to perform an unattended installation of WebSphere Application Server?

A. The installation for the particular target platform is being done for the first time.

B. The installation for the particular target platform has been done before and will be repeated in the future.

C. The installation for WebSphere Application Server would initially not be able to include administrative security.

D. The installation for the particular target platform is expected to require a lot of adjustments to be done over several installation attempts.

Answer: B

Visualexams.com was founded in 2006. The safer,easier way to help you pass any IT Certification exams . We provide high quality IT Certification exams practice questions and answers(Q&A). Especially Adobe, Apple, Citrix, Comptia, EMC, HP, HuaWei, LPI, Nortel, Oracle, SUN, Vmware and so on. And help you pass any IT Certification exams at the first try.
