

Exam : IBM 000-634

**Title : Rational-object orienten
analysis and design-part2**

Version : Demo

Important Note, Please Read Carefully

Other VisualExams products

[All visualexams IT Exam Products](#)

Our products of Offline Testing Engine

Use the offline Testing engine product to practice the questions in an exam environment.

Build a foundation of knowledge which will be useful also after passing the exam.

Latest Version

We are constantly reviewing our products. New material is added and old material is revised. Free updates are available for 90 days after the purchase. You should check your member zone at VisualExams and update 3-4 days before the scheduled exam date.

Here is the procedure to get the latest version:

1. Go to <http://www.visualexams.com/>
2. Log in the **User Center**
3. The latest versions of all purchased products are downloadable from here. Just click the links.

Feedback

If you spot a possible improvement then please let us know. We always interested in improving product quality.

Feedback should be send to Visualexams@hotmail.com. You should include the following: Exam number, version, page number, question number, and your login Account.

Our experts will answer your mail promptly.

Explanations

This product does not include explanations at the moment. If you are interested in providing explanations for this exam, please contact Visualexams@hotmail.com.

Features

- Comprehensive questions with complete details
- Instant Downloadable in PDF form.
- Verified Answers Researched by Industry Experts
- Questions accompanied by exhibits.
- Drag and Drop questions as experienced in the Actual Exams.
- These questions and answers are backed by our GUARANTEE.
- Questions updated on regular basis.
- Like actual certification exams our product is in multiple-choice questions (MCQs)

Commitment to Your Success: At VisualTestExam.com, we are committed to you ongoing success. Our exams and questions are constantly being updated and compared to industry standards.

Want to earn a Microsoft certification like MCSE, MCSE 2003, CCNA, CCNP? Thinking about getting an A+ or CCSP?

A, CCSP or Network+ Certification with less effort and time. You will be astonished at the theoretical and practical knowledge you will acquire in such a short period of time using our Certification Training Products. Our Study material will enable you to pass your Microsoft, Your Cisco and any other certification on the very first attempt.

Guarantee

Visualexams provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if somehow you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

1. What is true of iterations?

- A. A lifecycle phase may contain many iterations.
- B. Iterations may contain many phases.
- C. A major milestone marks the end of every iteration.
- D. You establish plans for each phase, but not for iterations.
- E. A construction iteration cannot include any activities from the Requirements workflow.

Answer: A

2. Stereotypes in the UML support generalization among model elements.

- A. True
- B. False

Answer: B

3. What is a derived attribute?

- A. An attribute whose value may be calculated based on the value of other attributes within the class.
- B. The value of an attribute for a particular object.
- C. An attribute that is retrieved from a database.
- D. An attribute that is inherited from a superclass.
- E. An attribute with a fixed value.

Answer: A

4. What is an abstract class?

- A. A superclass for which no direct instances may be created.
- B. A class that logically exists beyond the scope of the program that created it.
- C. A class that manages the interface communications within a system or among different systems.
- D. A class whose instances are collections of other objects.
- E. A class that serves as a template for other classes.

Answer: A

5. What characterizes a model?

- A. It is the same thing as a diagram.
- B. It is a complete description of a system from a particular perspective.
- C. It is rarely needed if an iterative lifecycle is used.
- D. It is not applicable to software development.

Answer: B

6. What pasc defines an association class?

- A. Is primarily a construct used during detailed design.
- B. Specifies that a class has attributes and operations.
- C. Is represented with a second association line next to the original.

- D. Should not be represented on class diagrams during analysis.
- E. Specifies that in a many-to-many association, each link has attributes and possibly operations.

Answer: E

7. Which of the following is not part of a use-case realization? (Select all that apply.)

- A. Sequence diagrams
- B. Use cases
- C. Collaboration diagrams
- D. Class diagrams

Answer: ACD

8. Which of the following are characteristics of a supplier object in a client-supplier relationship? (Select all that apply.)

- A. You can reuse it independent of its existing clients.
- B. It is an instance of a subclass.
- C. It provides a service or handles a message.
- D. It invokes a service or sends a message.

Answer: AC

9. What is a container class?

- A. A class whose instances are collections of other objects.
- B. A class for which you may create no instances.
- C. A class that logically exists beyond the scope of the program that created it.
- D. A class that serves as a template for other classes.
- E. A class that manages the interface communications within a system or among different systems.

Answer: A

10. What is a scenario? (Select all that apply.)

- A. A series of use cases that describe the functional requirements for the system.
- B. An instance of a use case.
- C. Something that has state, behavior, and identity.
- D. A set of time-ordered steps or statements expressed in natural language.

Answer: BD

11. Which of the following are characteristics of software architecture? (Select all that apply.)

- A. Composition of structural and behavioral elements into progressively larger subsystems.
- B. Selection of the structural elements and their interfaces by which a system is composed.
- C. Behavior as specified in collaborations among those elements.
- D. Detailed user interface design.
- E. Architectural style that guides this organization, these elements and their interfaces, their collaborations,

and their composition.

Answer: ABCE

12. Which of the following is not a major milestones of the Rational Unified Process? (Select all that apply.)

- A. Lifecycle Architecture (LCA)
- B. Lifecycle Objective (LCO)
- C. Product Release
- D. Initial Operation Capability (IOC)
- E. Preliminary Design Review (PDR)

Answer: E

13. What characterizes a development case?

- A. An architectural design decision.
- B. A development cycle specifically devoted to maintenance.
- C. A tailoring of the Rational Unified Process to suit the needs of a particular project or organization.
- D. Another name for a key mechanism.
- E. One way of using the system.

Answer: C

14. Which is a step in the Describe the Run-time Architecture activity?

- A. Create Initial Design Classes
- B. Identify Processes and Threads
- C. Identify Events and Signals
- D. Allocate System Elements to Nodes

Answer: B

15. Modularity is the organization of a problem into different levels of abstraction.

- A. True
- B. False

Answer: B

16. Which of the following are phases in the Rational Unified Process? (Select all that apply.)

- A. Analysis
- B. Construction
- C. Transition
- D. Elaboration
- E. Inception

Answer: BCDE

17. What is polymorphism?

- A. The ability to hide many different implementations behind a single interface.

- B. A specialized form of association in which a whole is related to its parts.
- C. The practice of hiding the implementation of a class from clients.
- D. A relationship in which one class shares the structure and/or behavior of one or more classes.
- E. A reference to the number of instances of a class related to one instance of another class.

Answer: A

18. According to the principle of encapsulation, which of the following should be placed in the visible portion (or interface) of a class? (Select all that apply.)

- A. Associations
- B. Operations
- C. Attributes
- D. Realizations

Answer: B

19. What pase defines generalization?

- A. A relationship in which one class shared the structure and /or behavior of one or more classes.
- B. The number of instances of a class related to one instance of another class.
- C. A specialized form of association in which a whole is related to its parts.
- D. The practice of separating the interface of a class from its implementation and hiding the implementation.
- E. The ability to hide many different implementations behind a single interface.

Answer: A

20. What are analysis mechanisms?

- A. A description of how the team will implement non-functional requirements.
- B. A means to capture and communicate the technically difficult aspects of a solution in a way that is implementation independent
- C. The modeling guidelines that should be adhered to during Architectural Analysis.
- D. The process the team should follow during Architectural Analysis.

Answer: B

Visualexams.com was founded in 2006. The safer,easier way to help you pass any IT Certification exams . We provide high quality IT Certification exams practice questions and answers(Q&A). Especially Adobe, Apple, Citrix, Comptia, EMC, HP, HuaWei, LPI, Nortel, Oracle, SUN, Vmware and so on. And help you pass any IT Certification exams at the first try.
