- A. Write the requirement so that a measurement can determine if it is met.
- B. Create a traceability link from the requirement to a testable functional requirement.
- C. Add a traceability link from it back to a feature on which it is based.
- D. Place the requirement in the "Special Requirements" property of a Use Case Report.

**Answer: A**

13. What does a fishbone diagram identify when defining stakeholder needs?

- A. Root causes
- B. Constraints
- C. Boundaries
- D. Stakeholders

**Answer: A**

14. Given: A customer service system is being developed for a telephone company to record and answer questions about telephone installations. Which of the following are requirement attributes for the system? (Select all that apply.)

- A. The use case for recording phone installations is approved.
- B. Users can record length of time for each phone installation.
- C. The system will be available 24 hours a day.
- D. The requirement "automatic assignment of installers" was suggested by Tom Jones.

**Answer: AD**

15. Given: A customer service system is being developed for a telephone company to record and answer questions about telephone installations. Which of the following are system features? (Select all that apply.)

- A. Produces status reports about telephone installations
- B. Includes a Phone Installer class
- C. Runs on the Windows 95 operating system
- D. Accommodates simultaneously entry of information from up to 100 installers

**Answer:** ACD

16. Given: A customer service system is being developed for a telephone company to record and answer questions about telephone installations. What would be considered a non-functional requirement of the software?

- A. Includes a Phone Installation class
- B. Accommodates simultaneous entry of information from up to 100 installers
- C. Produces a status report
- D. Supports the Windows 98 and Windows 2000 operating systems

**Answer:** BD

17. What does a non-functional requirement specify?

- A. Quality attributes of the system
- B. How to fulfill stakeholder requests
- C. How the solution interacts with the outside world
- D. Process used to build the system

**Answer:** A

18. Which of the following expressions partially define "requirement"? (Select all that apply.)

- A. Capability that must be performed by the software
- B. Test case that must be part of the test suite for the software
- C. Condition with which the software must comply
- D. Structural component that must be part of the software

**Answer:** AC

19. What is the main advantage of using brainstorming to identify software requirements?

- A. Focuses on the usability requirements of the system
- B. Encourages quick generation of many requirements

- C. Gives the customer more buy-in to the requirements process
- D. Allows in-depth explanation of each requirement

**Answer: B**

20. When identifying root causes of a problem, resolving what percentage of the most important root causes will solve 80% of a problem?

- A. 20%
- B. 40%
- C. 60%
- D. 80%

**Answer: A**

Visualexams.com was founded in 2006. The safer,easier way to help you pass any IT Certification exams . We provide high quality IT Certification exams practice questions and answers(Q&A). Especially Adobe, Apple, Citrix, Comptia, EMC, HP, HuaWei, LPI, Nortel, Oracle, SUN, Vmware and so on. And help you pass any IT Certification exams at the first try.
