

Exam : IBM 000-992

**Title : Test992,IBM WebSphere MQ
V6.0. System Administration**

Version : Demo

Important Note, Please Read Carefully

Other VisualExams products

[All visual exams IT Exam Products](#)

Our products of Offline Testing Engine

Use the offline Testing engine product to practice the questions in an exam environment.

Build a foundation of knowledge which will be useful also after passing the exam.

Latest Version

We are constantly reviewing our products. New material is added and old material is revised. Free updates are available for 90 days after the purchase. You should check your member zone at VisualExams and update 3-4 days before the scheduled exam date.

Here is the procedure to get the latest version:

1. Go to <http://www.visual exams.com/>
2. Log in the **User Center**
3. The latest versions of all purchased products are downloadable from here. Just click the links.

Feedback

If you spot a possible improvement then please let us know. We always interested in improving product quality.

Feedback should be send to Visual exams@hotmail.com. You should include the following: Exam number, version, page number, question number, and your login Account.

Our experts will answer your mail promptly.

Explanations

This product does not include explanations at the moment. If you are interested in providing explanations for this exam, please contact Visual exams@hotmail.com.

Features

- Comprehensive questions with complete details
- Instant Downloadable in PDF form.
- Verified Answers Researched by Industry Experts
- Questions accompanied by exhibits.
- Drag and Drop questions as experienced in the Actual Exams.
- These questions and answers are backed by our GUARANTEE.
- Questions updated on regular basis.
- Like actual certification exams our product is in multiple-choice questions (MCQs)

Commitment to Your Success: At VisualTestExam.com, we are committed to you ongoing success. Our exams and questions are constantly being updated and compared to industry standards.

Want to earn a Microsoft certification like MCSE, MCSE 2003, CCNA, CCNP? Thinking about getting an A+ or CCSP?

A, CCSP or Network+ Certification with less effort and time. You will be astonished at the theoretical and practical knowledge you will acquire in such a short period of time using our Certification Training Products. Our Study material will enable you to pass your Microsoft, Your Cisco and any other certification on the very first attempt.

Guarantee

Visualexams provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if somehow you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

1. Which statement is true about the rule conditions and actions that are defined for a business rules task?

- A.They are used in process simulation.
- B.They are transformed into a global business task.
- C.They are displayed on the process diagram.
- D.They are handed off for development.

Answer: D

2. Which attribute CANNOT be selected in the Swimlane layout?

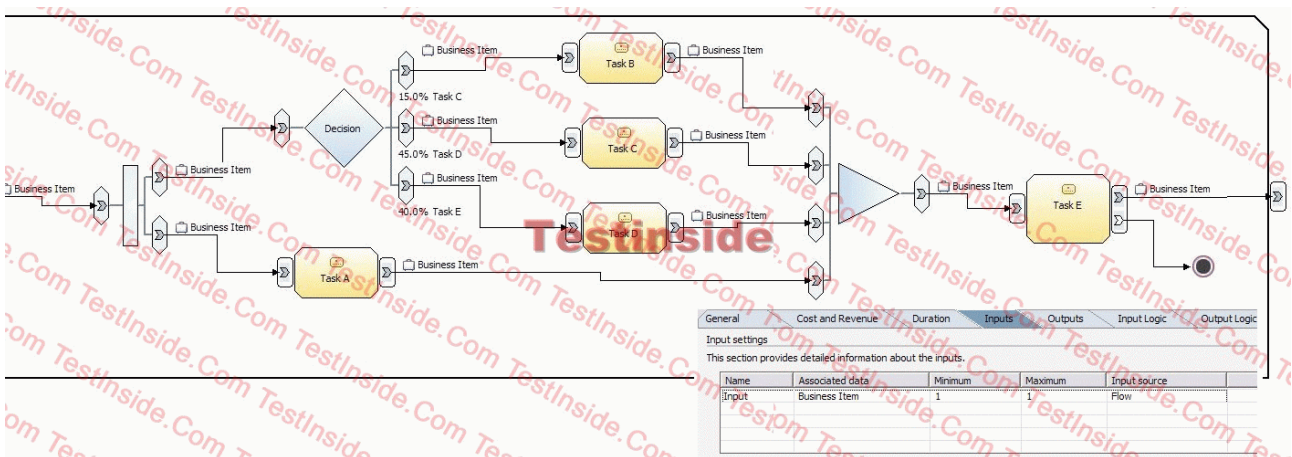

- A.Layout by Individual Resource Definition
- B.Layout by Bulk Resource Definition
- C.Layout by Business Item
- D.Layout by Location
- E.Layout by Organization Unit

Answer: C

3. Click the Exhibit button.

Simulation is being performed on the process shown in the exhibit. Task E input criteria is set to accept a Minimum and Maximum of one token, as shown in the exhibit.

Based on the process syntax, how many times will Task E be instantiated if 100 tokens enter the fork?

- A.100
- B.200
- C.Unknown, the decision is inclusive, and multiple combinations of true paths could be taken for each token.

D.Task E will never be instantiated as input constructs of Task E do not support multiple input possibilities.

Answer: B

4. What is the most efficient way to validate a business model and the attribute values used for simulation?

A.Run Process Instances Summary report

B.Run Simulation Profile report

C.Run General Analysis > Type Instance Matching Analysis

D.Run Profile Analysis > Profile Specification

Answer: D

5. Several process owners are planning a meeting to exchange information about their respective processes. They need to be able to communicate the sequence of steps in their own process as well as how their processes relate to other processes.

Which predefined report should they bring to their meeting?

A.Process details report

B.Process procedure report

C.Process summary report

D.Process specification report

Answer: B

6. What is the purpose of business process management?

A.To fit business processes into a configuration that solves real problems

B.To create a comprehensive set of business processes to be deployed on an SOA infrastructure and managed using well-defined metrics

C.To define and implement business process goals that will be applied to automated activities

D.To define business goals, design and implement processes, and measure performance against the goals

Answer: D

7. What is a Key Performance Indicator (KPI)?

A.A measurement to track performance against business objectives

- B.A predictor of when an optimal activity state will occur
- C.A metric captured for averaging response times across multiple instances
- D.A category of metrics for reporting performance

Answer: A

8. What is business process modeling?

- A.Capturing organization, processes, services, and staff
- B.Creating activity flows that assure the business process simulations will identify corporate goals
- C.Capturing processes, flows, data, resources, and business measures
- D.Creating technology representations of the business, including business services and KPIs

Answer: C

9. What is the business process modeling lifecycle?

- A.Gathering requirements, design, model, and implement design
- B.Iterating through Basic, Intermediate, and Advanced modes of modeling
- C.Iteratively simulating business activities, repeating until requirements are met
- D.Iteratively capturing processes, collaborating on design, simulation, and optimization

Answer: D

10. Which two parts does WebSphere Business Modeler play in the SOA lifecycle? (Choose two.)

- A.It provides outputs for production deployment.
- B.It provides outputs to assemble for deployment.
- C.It accepts inputs from deployment.
- D.It accepts inputs from orchestration and assembly.
- E.It accepts inputs from monitoring.

Answer: BE

11. Which activities for the SOA lifecycle are in the correct order?

- A.Define > Model > Assemble > Optimize > Deploy
- B.Envision > Define > Model > Assemble > Test > Deploy

- C. Model > Simulate > Deploy > Manage > Improve
- D. Model > Assemble > Deploy > Manage

Answer: D

12. Which business process modeling methodologies does WebSphere Business Modeler most effectively support? (Choose two.)

- A. Methodologies that use comparative analysis between two models
- B. What if modeling to expose process thresholds and possible areas for improvement
- C. Iterative, object-oriented methodologies that incrementally add processes to the model
- D. Event-driven process chain methodologies that identify bottlenecks
- E. Built-in methodologies that are enforced as the product is used

Answer: AB

13. What is a critical success factor in process modeling?

- A. Definition of the organizations hierarchy in the modeled project
- B. Storage of business items in the organizations data repository
- C. Inclusion of events for use in the organizations business measurement system
- D. Participation by stakeholders from different business domains

Answer: D

14. What is important in the selection of Key Performance Indicators (KPIs)?

- A. KPIs should be unique to the process model and verified in a simulation test.
- B. KPIs should provide early detection of issues to enable corrective action.
- C. KPIs should not overlap with other KPIs, especially from other domains.
- D. Each KPI should be measured at the task output during simulation.

Answer: B

15. Which statement is true about the Service element in WebSphere Business Modeler?

- A. Services color-code process elements.
- B. Services are external processes.

- C.Services can be local or global.
- D.Services execute from a repository.

Answer: B

16. What is the simplest way for the analyst to change a local subprocess into a local task?

- A.Right-click in the subprocess diagram, select 'Demote to Local Task'
- B.Right-click on the subprocess, select Convert to > Local Task
- C.Right-click on the local subprocess in the project tree, select Convert to > Local Task
- D.Add a local task to the diagram, change the connections and delete the subprocess

Answer: B

17. Which three task attributes can be specified with distribution? (Choose three.)

- A.Cost
- B.Resource
- C.Role
- D.Duration
- E.Classifier values
- F.Revenue
- G.Timetable

Answer: ADF

18. Which predefined classifier value represents an activity that is currently performed manually, but could be converted to an automated activity?

- A.Quality control
- B.Business value added
- C.Current workflow
- D.Potential workflow
- E.Real value added

Answer: D

19. Which are specialized tasks that enable notification while a process is running?

- A.Services and listener
- B.Broadcaster and observer
- C.Broadcaster and receiver
- D.Services and observer

Answer: C

20. Which action occurs when a human task does not reach an expected state (for example, ended) within a specified time period?

- A.Escalation
- B.Compensation
- C.Notification
- D.Assignment

Answer: A

Visualexams.com was founded in 2006. The safer,easier way to help you pass any IT Certification exams . We provide high quality IT Certification exams practice questions and answers(Q&A). Especially Adobe, Apple, Citrix, Comptia, EMC, HP, HuaWei, LPI, Nortel, Oracle, SUN, Vmware and so on. And help you pass any IT Certification exams at the first try.
