

Exam : SCO Caldera 090-091

**Title : UNIXWARE 7 NONSTOP
CLUSTERS
CERTIFICATION EXAM
V1.0a0**

Version : Demo

Important Note, Please Read Carefully

Other VisualExams products

[All visualexams IT Exam Products](#)

Our products of Offline Testing Engine

Use the offline Testing engine product to practice the questions in an exam environment.

Build a foundation of knowledge which will be useful also after passing the exam.

Latest Version

We are constantly reviewing our products. New material is added and old material is revised. Free updates are available for 90 days after the purchase. You should check your member zone at VisualExams and update 3-4 days before the scheduled exam date.

Here is the procedure to get the latest version:

1. Go to <http://www.visualexams.com/>
2. Log in the **User Center**
3. The latest versions of all purchased products are downloadable from here. Just click the links.

Feedback

If you spot a possible improvement then please let us know. We always interested in improving product quality.

Feedback should be send to Visualexams@hotmail.com. You should include the following: Exam number, version, page number, question number, and your login Account.

Our experts will answer your mail promptly.

Explanations

This product does not include explanations at the moment. If you are interested in providing explanations for this exam, please contact Visualexams@hotmail.com.

Features

- Comprehensive questions with complete details
- Instant Downloadable in PDF form.
- Verified Answers Researched by Industry Experts
- Questions accompanied by exhibits.
- Drag and Drop questions as experienced in the Actual Exams.
- These questions and answers are backed by our GUARANTEE.
- Questions updated on regular basis.
- Like actual certification exams our product is in multiple-choice questions (MCQs)

Commitment to Your Success: At VisualTestExam.com, we are committed to you ongoing success. Our exams and questions are constantly being updated and compared to industry standards.

Want to earn a Microsoft certification like MCSE, MCSE 2003, CCNA, CCNP? Thinking about getting an A+ or CCSP?

A, CCSP or Network+ Certification with less effort and time. You will be astonished at the theoretical and practical knowledge you will acquire in such a short period of time using our Certification Training Products. Our Study material will enable you to pass your Microsoft, Your Cisco and any other certification on the very first attempt.

Guarantee

Visualexams provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if somehow you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

1. Which statement best describes how SSI is implemented in filesystems on UnixWare 7 NonStop Clusters?

- A. Through the cluster filesystem(CFS),which provides a global view of all filesystems in a single file tree and allows them to be protected for failover.
- B. Through a modifile version of NFS sharing mounts in a special,transparent,inter-node manner.
- C. Through a modifile version of RFS sharing mounts in a special,transparent,inter-node manner.
- D. Not at all.

Answer: A

2. You should choose CNM as your protected storage method when:

- A.You want the fastest possible disk I/O performace
- B.You want the lowest-possible window of vulnerability when a node fails
- C.You are willing and able to accept the slower write performance and greater window of vulnerability to reduce the price of the cluster
- D.You dont care about the price of the cluster

Answer: C

3. In UnixWare 7 NonStop Clusters,which resources do NOT need to be protected to prevent unavailability of the cluster in the event the resources fails?

- A. Filesystems,except the boot(/stand)filesystem for each node
- B. Shared memory
- C. semaphores
- D. Video monitors

Answer: D

4. In clustering,a protected resource is one that:

- A. Has special circuits that keep if from being damaged during a voltage surge
- B. Is monitored by special hardware such that if should fail,support engineers will be notified immediately that it need to be replaced
- C. Is monitored by special software to insure that it is not over-used

D. Is redundant in a cluster to avoid a single point of failure(SPF)and is automatically pressed into service by the cluster in the event the primary component fails

Answer: D

5. The key to reliability and availability in a cluster is:

A. Having lots of spare parts on hand so that if something fails,it can be quickly replaced,causing minimal down time.

B. Having a hardware design that avoids any single point of failure,and a fault-tolerant operating system that knows how to press redundant hardware into service automatically.

C. Staffing the computer system with knowledgeable technicians 24x7.

D. Using the ringht monolithic computer system.

Answer: B

6. What is the maximum distance you can run long-wave FDDI cables without any signal modification?

A. 2 kilometers

B. 10 kilometers

C. 2 miles

D. 10 miles

Answer: A

7. Which statement best describes the term N+1 failover configuration for nodes?

A. All resources but one are pressed into service.Loss of a single resource causes failover to another resource,preserving performance.

B. All resources but one are always pressed into service.Loss of a second resource causes the cluster to become unavailable.

C. N+1 is a hardware-specific concept that indicates how to configure disks in a node.

D. N+1 is a software-specific concept that indicates how to configure daemon failover on a node.

Answer: A

8. Which statement best defines a node within a cluster?

- A. A complete computer(PAM,CPU,disk(s)),connected to the other nodes in the cluster by way of a server area network(SAN)
- B. The SAN cards placed in each machine in a cluster
- C. The LAN cards placed in each machine in a cluster
- D. A computer connected to the other nodes in the cluster by way of a LAN,which contains only CPUs,PAM,LAN,and SAN cards,no other peripherals

Answer: A

9. Which of the following licenses apply on a cluster-wide basis,as opposed to per-node?

- A. CPUs
- B. RAm
- C. Users
- D. Departmental/Enterprice

Answer: C

10. During installation of UnixWare 7 on node 1,you should:

- A. Defer configuration of any networking cards
- B. Defer configuration of all but the first networking cards
- C. Configure any networking cards
- D. Configure any networking card being used for LAN activity but no networking card used for SAN activity

Answer: A

Visualexams.com was founded in 2006. The safer,easier way to help you pass any IT Certification exams . We provide high quality IT Certification exams practice questions and answers(Q&A). Especially Adobe, Apple, Citrix, Comptia, EMC, HP, HuaWei, LPI, Nortel, Oracle, SUN, Vmware and so on. And help you pass any IT Certification exams at the first try.
