1. Paul is attempting to log into server4/acme with his Sametime Connect client while visiting a corporate branch office overseas that has it's own Sametime server. The following scenario exists:

- He is not listed in the Allow Access field for that Domino server
- His home Sametime server is server1/acme and both share a common directory
- The two servers are not in a Community Cluster.

Which of the following steps will Sametime perform in this scenario?

- A.Paul will be immediately denied access and will receive a prompt to that effect
- B.Paul will attempt to log into server4/acme and after a lookup occurs he will be passed to server1/acme
- C.Paul will successfully log into server4/acme and that server will grab his privacy data and buddylist from server1/acme for him
- D.Paul will be logged into both servers simultaneously and his privacy data will not be in effect for anyone with a home server of server4/acme

**Answer: B**

2. You have chosen LDAP as the directory for your Sametime server. However, you have a Sametime administrator in the local Domino Directory. You are able to successfully log into administer the server through the Sametime Administration Tool. Which of the following will not function correctly in this scenario?

- A.You will not have the Assign Users function for policies
