Latest Version

We are constantly reviewing our products. New material is added and old material is revised. Free updates are available for 90 days after the purchase. You should check your member zone at VisualExams and update 3-4 days before the scheduled exam date.

Here is the procedure to get the latest version:

1. Go to <http://www.visual exams.com/>
2. Log in the **User Center**
3. The latest versions of all purchased products are downloadable from here. Just click the links.

Feedback

If you spot a possible improvement then please let us know. We always interested in improving product quality.

Feedback should be send to Visual exams@hotmail.com. You should include the following: Exam number, version, page number, question number, and your login Account.

Our experts will answer your mail promptly.

Explanations

This product does not include explanations at the moment. If you are interested in providing explanations for this exam, please contact Visual exams@hotmail.com.

Features

- Comprehensive questions with complete details
- Instant Downloadable in PDF form.
- Verified Answers Researched by Industry Experts
- Questions accompanied by exhibits.
- Drag and Drop questions as experienced in the Actual Exams.
- These questions and answers are backed by our GUARANTEE.
- Questions updated on regular basis.
- Like actual certification exams our product is in multiple-choice questions (MCQs)

Commitment to Your Success: At VisualTestExam.com, we are committed to you ongoing success. Our exams and questions are constantly being updated and compared to industry standards.

Want to earn a Microsoft certification like MCSE, MCSE 2003, CCNA, CCNP? Thinking about getting an A+ or CCSP?

A, CCSP or Network+ Certification with less effort and time. You will be astonished at the theoretical and practical knowledge you will acquire in such a short period of time using our Certification Training Products. Our Study material will enable you to pass your Microsoft, Your Cisco and any other certification on the very first attempt.

Guarantee

Visualexams provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if somehow you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

1. As user smith you want the CPU utilization of all the users logged on to server1 server. You want the information available automatically as soon as you login to the bash login shell and want the information available only to smith.

What would you do on server1, which has all the default shell configuration files, to accomplish the task?

- A. Add the w command to ~/.profile file.
- B. Add the who command to ~/.profile file.
- C. Add the w command to ~/.bash_profile file.
- D. Add the who command to ~/.bash_profile file.

Answer: C

2. View the Exhibit.

```
echo " Enter your option (who,date,ls)"
read input
case "$input" in
  who ) echo " Finding the currently logged in users..., The following is the
        list"
        who
        ;;
  date ) echo " Printing todays date and current time"
        date
        ;;
  ls ) echo " Running the ls command..."
        ls
        ;;
  * ) echo " You have entered an invalid choice, Plz enter either who, date
        or ls "
        ;;
esac
exit 0
```

The shell script is executed using the default shell interpreter with the input as w. What will be the output of the script based on this input?

- A. It will print the current date and time.
- B. It will list all the currently logged in users.
- C. It will show that the input is not a valid option.
- D. It will print the currently logged in users, current date, and time.
- E. It will not show any result because the case block is terminated with an esac.

Answer: C

3. You have to start a process in the bash shell and at the same time want to work in the shell. How would you achieve this without terminating the process?

- A. Press [Ctrl] + [y] while the process is running.
- B. Press [Ctrl] + [d] while the process is running.
- C. Press [Ctrl] + [z] while the process is running.

D. Press [Ctrl] + [c] while the process is running.

Answer: C

4. As user smith you want to log in to a remote machine in a securely encrypted channel. Which utility would you use for the purpose?

- A. ssh
- B. ftp
- C. telnet
- D. rlogin

Answer: A

5. You executed the following command to verify the integrity of sendmail:

```
[root@station1 ~]# rpm -Va sendmail
.....T. c /etc/mail/sendmail.cf
S.5....T. c /var/log/mail/statistics
[root@station1 ~]#
```

What do infer about the /var/log/mail/statistics file from the output?

- A. The permissions, user ownership, and file type have changed.
- B. The permissions, group ownership and file type have changed.
- C. The user ownership, group ownership and file type have changed.
- D. The MD5 signature, file size, and modification time have changed.

Answer: D

6. Which three statements are true about the mount command? (Choose three.)

- A. It supports labels for mounting.
- B. It can be used only by root to mount the local file system.
- C. By default it can be used by an ordinary user to mount the local file system.
- D. It will list all the currently mounted file systems, if executed without any arguments.
- E. It will list only the file systems listed in /etc/fstab if executed without any arguments

Answer: ABD

7. Which statements are true about xauth? (Choose all that apply.)

- A. It stores all tokens in a file on the system.
- B. It must be available to use X11 forwarding.
- C. It distributes token on a host-by-host basis.
- D. It can be used to control token-based access control.
- E. It is not possible to install just xauth without installing the entire X server.

Answer: ABD

8. What is the minimum number of disk partitions required to have a successful Linux installation?

- A. 2 (two)
- B. 4 (four)
- C. 1 (one)
- D. 3 (three)

Answer: C

9. View the Exhibit.

```
[smith@server1 ~]$ groups
smith apps
[smith@server1 ~]$ ls -ld /tmp/backup/
drwxr----x 2 root apps 4096 Mar 28 19:44 /tmp/backup/
[smith@server1 ~]$
```

What are the privileges granted to the user smith on the /tmp/backup directory?

- A. He can only list the contents of /tmp/backup.
- B. He can only navigate to the /tmp/backup directory.
- C. He can change to and copy contents from the /tmp/backup directory.
- D. He can only change to and from the /tmp/backup directory but cannot list its contents.

Answer: A

10. Which statements are true about the File Extensions? (Choose all that apply.)

- A. File extensions are just part of the file name.
- B. File extensions are cared by all applications.
- C. File content depends upon the file extensions.
- D. File extensions do not always say what the file is.
- E. File extensions have no special meaning to the kernel.

Answer: ADE

11. You executed the following command on a Linux machine:

```
sed s/hello/fun/g file1.txt | tr a-z A-Z > file2.txt
```

What three things would this command do? (Choose three.)

- A. Save all changes to file2.txt.
- B. Translate all uppercase characters to lowercase.
- C. Translate all lowercase characters to uppercase.
- D. Modifies file1.txt and creates file2.txt.

- E. Replace all occurrences of the entry hello with the entry fun.
- F. Replace all occurrences of the entry fun with the entry hello.

Answer: ACE

12. You have issued the following command:

```
mkdir -p test/a{dax,connor,bryan}g/vo{in,out,tmp}
```

Which of the following directories will it create? (Choose all that apply.)

- A. test/voin/adaxg
- B. test/adaxg/voout
- C. test/aconnorg/voin
- D. test/adaxnnorg/voinout
- E. test/aconnoyang/vointmp

Answer: BC

13. The GNU project was started by Free Software Foundation (FSF) with a goal to create a Free UNIX Clone.

What do you understand by the term Free as per the terms of FSF?

- A. The source code will be provided free of cost with the software.
- B. The software is fully free and is charged only to fix breakdowns.
- C. The software is distributed free in runnable (installable) form with no cost.
- D. The software is distributed free but does not offer the freedom to redistribute it.

Answer: A

14. Why is a Linux operating system always developed and released under a common standard known as Linux Standard Base (LSB)?

- A. to avoid interoperability
- B. to avoid POSIX Compliance
- C. to ensure application-level diversity
- D. to ensure compatibility among distributions

Answer: D

15. Identify the option that has the correct match for an Enterprise Linux standard/feature with its description:

- | | |
|----------|--|
| 1) POSIX | a) helps software to predict the location of installed files and directories |
| 2) FHS | b) helps provide compatibility among distributions |
| 3) LSB | c) GNU project's replacement for the UNIX kernel to work in Linux |
| 4) HURD | d) assures code portability between systems |

A. 1-b, 2-d, 3-a, 4-c

B. 1-d, 2-a, 3-b, 4-c

C. 1-c, 2-a, 3-d, 4-b

D. 1-b, 2-c, 3-d, 4-a

Answer: B

16. Identify the shareable directories according to File system Hierarchy Standard (FHS).

(Choose all that apply.)

A. /etc

B. /usr

C. /var/run

D. /var/lock

E. /var/mail

F. /etc/sysconfig

Answer: BE

17. Identify the two main branches from the UNIX family tree, where the cross-pollination between these branches was responsible for making UNIX so powerful. (Choose two.)

A. MIT

B. GNU

C. BSD

D. POSIX

E. BESYS

F. System V

Answer: CF

18. Multiple users can share a UNIX machine. This is made possible by the OS by using one user's idle time to service other users. What is this feature of an operating system identified as?

A. data sharing

B. time sharing

C. one-time initialization

D. light weight kernel threading

E. interrupt driven process handling

Answer: B

19. UNIX was known as the most stable operating system ever released. Identify two major design principles that help attain this stability. (Choose two.)

A. easily modifiable end user programs

B. all configuration data stored in binary files

C. entire policy decisions made by the kernel

D. everything in UNIX is either a file or a process

Answer: AD

20. You have logged in as normal user bob with the default login shell. An attempt by bob to change the default shell to /bin/sh fails with an error.

What could be the possible reason?

- A. The SUID bit is not set on chsh by default.
- B. The /bin/sh entry is not listed in /etc/shells file.
- C. bob does not have the permissions to change the shell by default.
- D. bob does not have read permissions on the /etc/shells file by default.

Answer: B

Visualexams.com was founded in 2006. The safer,easier way to help you pass any IT Certification exams . We provide high quality IT Certification exams practice questions and answers(Q&A). Especially Adobe, Apple, Citrix, Comptia, EMC, HP, HuaWei, LPI, Nortel, Oracle, SUN, Vmware and so on. And help you pass any IT Certification exams at the first try.
