Latest Version

We are constantly reviewing our products. New material is added and old material is revised. Free updates are available for 90 days after the purchase. You should check your member zone at VisualExams and update 3-4 days before the scheduled exam date.

Here is the procedure to get the latest version:

1. Go to <http://www.visualexams.com/>
2. Log in the **User Center**
3. The latest versions of all purchased products are downloadable from here. Just click the links.

Feedback

If you spot a possible improvement then please let us know. We always interested in improving product quality.

Feedback should be send to Visualexams@hotmail.com. You should include the following: Exam number, version, page number, question number, and your login Account.

Our experts will answer your mail promptly.

Explanations

This product does not include explanations at the moment. If you are interested in providing explanations for this exam, please contact Visualexams@hotmail.com.

Features

- Comprehensive questions with complete details
- Instant Downloadable in PDF form.
- Verified Answers Researched by Industry Experts
- Questions accompanied by exhibits.
- Drag and Drop questions as experienced in the Actual Exams.
- These questions and answers are backed by our GUARANTEE.
- Questions updated on regular basis.
- Like actual certification exams our product is in multiple-choice questions (MCQs)

Commitment to Your Success: At VisualTestExam.com, we are committed to your ongoing success. Our exams and questions are constantly being updated and compared to industry standards.

Want to earn a Microsoft certification like MCSE, MCSE 2003, CCNA, CCNP? Thinking about getting an A+ or CCSP?

A, CCSP or Network+ Certification with less effort and time. You will be astonished at the theoretical and practical knowledge you will acquire in such a short period of time using our Certification Training Products. Our Study material will enable you to pass your Microsoft, Your Cisco and any other certification on the very first attempt.

Guarantee

VisualExams provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if somehow you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

1. Which resource type attributes can be set in order to tune VCS failover characteristics? (Choose two.)

- A. Flags
- B. RestartLimit
- C. ToleranceLimit
- D. OfflineTimeout
- E. OfflineMonitorInterval

Answer: BC

2. Which feature of VCS can prevent overloading of a system's resources in the event of service group failover?

- A. Parallel Service Groups
- B. Capacities
- C. Limits
- D. Load Failover Policy

Answer: C

3. Which attribute enables VCS to bring a resource online after it goes offline unexpectedly and before faulting the resource?

- A. RestartLimit
- B. OnlineRestartLimit
- C. AutoRestartLimit
- D. OnlineRetryLimit

Answer: A

4. Which VCS resource attribute setting prevents VCS from interpreting a Monitor entry point timeout as a resource fault?

- A. MonitorFault=0
- B. MonitorFaultTimeout=240
- C. FaultMonitor=240
- D. FaultOnMonitor=4

Answer: D

5. Under which condition can a service group be AutoDisabled?

- A. when hashadow cannot restart HAD on a system
- B. when the system is in a jeopardy membership
- C. when a firm service group dependency exists between two service groups and the parent service group fails
- D. when a firm service group dependency exists between two service groups and the child service group fails

Answer: A

6. Which attributes impact service group failover? (Choose three.)

- A. FailOver
- B. AutoFailOver
- C. Faulted
- D. FaultPropagation
- E. Frozen

Answer: BDE

7. Which resource type attributes can be set in order to tune VCS failover characteristics? (Choose two.)

- A. AutoStart
- B. ConflInterval
- C. ConfTimeout
- D. MonitorInterval
- E. OfflineMonitorInterval

Answer: BD

8. Which statement is true about the violation trigger?

- A. A violation trigger must be written as a shell script.
- B. A violation trigger and notification are mutually exclusive.

- C. A violation trigger is dependent on notification to work.
- D. A violation trigger is automatically executed when events occur.

Answer: D

9. During a test of a NIC resource the VCS engine log indicates that the service group and the IP resource enter the FAULTED state on all systems in the cluster. The NIC resource enters the ONLINE state after the root cause of the fault is corrected. Which default attribute setting allows the service group to attempt to start without manual intervention?

- A. AutoStart
- B. AutoClear
- C. AutoRestart
- D. AutoFailover

Answer: C

10. Which types of monitoring can be performed on Oracle resources? (Choose two.)

- A. detail monitoring
- B. basic level monitoring
- C. kernel level monitoring
- D. specific monitoring
- E. service monitoring

Answer: AB

11. VCS is to be installed in a secure environment where remote installation between systems is impossible. The VCS configuration parameters were captured in a file using the installation script on the first system. What can be used to read the contents of the configuration file when executing locally on the remaining systems?

- A. -autoconfig
- B. -configfile
- C. -vcsconfig
- D. -responsefile

Answer: D

12. Which text files are created at the end of a successful run of `installvcs -installonly`? (Choose three.)

- A. log
- B. response
- C. gabtab
- D. llttab
- E. summary

Answer: ABE

13. Which components are installed when you execute the `installvcs` script? (Choose two.)

- A. bundled agents
- B. database agents
- C. cluster file system
- D. GAB driver
- E. cluster volume manager

Answer: AD

14. Which conditions are recommended for a successful VCS patch installation? (Choose two.)

- A. The clustered application must be shut down.
- B. VCS must be shut down only on the server being patched.
- C. VCS must be shut down on all cluster nodes.
- D. GAB and LLT must be shut down on all cluster nodes.
- E. GAB and LLT must remain running and connected.

Answer: CD

15. Which directive in the `llttab` file defines a network interface for a heartbeat?

- A. nic
- B. link
- C. heartbeat

D. hbdev

Answer: B

16. You are adding a system to a running cluster. You have successfully performed these steps on the system that you are adding:

1. installed, configured, and tested all application resources required
2. installed VCS
3. configured and started VCS communications (LLT and GAB)

What is the next step that you perform?

- A. update the resource attributes to enable resources to run on the new system
- B. update the service group attributes to enable groups to run on the new system
- C. change the cluster attribute for VCS user names to match accounts on the new system
- D. change the owner of the system attributes so that all cluster systems are the same

Answer: B

17. Which procedure must be followed to remove the resource type TypeA from an active VCS cluster?

- A. remove all resources of TypeA, remove TypeA, and remove TypeA packages
- B. remove TypeA, then execute the hatype esync command
- C. stop VCS, remove all resources of TypeA, and start VCS
- D. execute the hatype -remove command which will remove all the resources

Answer: A

18. What is the default level of authorization of a new VCS user?

- A. Cluster Administrator
- B. Cluster Operator
- C. Cluster Guest
- D. Group Administrator
- E. Group Operator

Answer: C

19. When preparing to install VCS on the S1 and S2 systems, what should you do to verify software compatibility? (Choose three.)

- A. check the VCS release notes for supported software
- B. run the `installvcs recheck S1 S2` command
- C. let the `installvcs` script check compatibility at install
- D. run the `installvcs ompat S1 S2` command
- E. check the Symantec Enterprise Support website

Answer: ABE

20. You are installing a VCS upgrade that does not require a system reboot, but does require a VCS restart. Which method maximizes user access to the clustered applications during the upgrade?

- A. use the VCS rolling upgrade option which restarts VCS transparently
- B. stop VCS using the `orce` option and then restart VCS on each system
- C. evacuate service groups while upgrading one system at a time
- D. stop VCS using the `all` option and then restart VCS on each system

Answer: B

Visualexams.com was founded in 2006. The safer,easier way to help you pass any IT Certification exams . We provide high quality IT Certification exams practice questions and answers(Q&A). Especially Adobe, Apple, Citrix, Comptia, EMC, HP, HuaWei, LPI, Nortel, Oracle, SUN, Vmware and so on. And help you pass any IT Certification exams at the first try.
