Latest Version

We are constantly reviewing our products. New material is added and old material is revised. Free updates are available for 90 days after the purchase. You should check your member zone at VisualExams and update 3-4 days before the scheduled exam date.

Here is the procedure to get the latest version:

1. Go to <http://www.visualexams.com/>
2. Log in the **User Center**
3. The latest versions of all purchased products are downloadable from here. Just click the links.

Feedback

If you spot a possible improvement then please let us know. We always interested in improving product quality.

Feedback should be send to Visualexams@hotmail.com. You should include the following: Exam number, version, page number, question number, and your login Account.

Our experts will answer your mail promptly.

Explanations

This product does not include explanations at the moment. If you are interested in providing explanations for this exam, please contact Visualexams@hotmail.com.

Features

- Comprehensive questions with complete details
- Instant Downloadable in PDF form.
- Verified Answers Researched by Industry Experts
- Questions accompanied by exhibits.
- Drag and Drop questions as experienced in the Actual Exams.
- These questions and answers are backed by our GUARANTEE.
- Questions updated on regular basis.
- Like actual certification exams our product is in multiple-choice questions (MCQs)

Commitment to Your Success: At VisualTestExam.com, we are committed to you ongoing success. Our exams and questions are constantly being updated and compared to industry standards.

Want to earn a Microsoft certification like MCSE, MCSE 2003, CCNA, CCNP? Thinking about getting an A+ or CCSP?

A, CCSP or Network+ Certification with less effort and time. You will be astonished at the theoretical and practical knowledge you will acquire in such a short period of time using our Certification Training Products. Our Study material will enable you to pass your Microsoft, Your Cisco and any other certification on the very first attempt.

Guarantee

VisualExams provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if somehow you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

1. In which situation will Solaris Volume Manager volumes continue to function normally in the event of the corruption of one copy of its state database?

- A. Solaris Volume Manager volumes will function normally if the master copy of the state database is not corrupted.
- B. Solaris Volume Manager volumes will function normally if the copy of the state database on the boot disk is available.
- C. Solaris Volume Manager volumes will function normally if no more than a single copy of the state database is corrupted.
- D. Solaris Volume Manager volumes will function normally if more than half of the copies of the state database are available.

Answer: D

2. You have Solaris Volume Manager installed on your system and want to create your first metadevice. What initial action must you take?

- A. run a command to create the first state database
- B. run a utility to add a license to enable SVM for Solaris 9
- C. run a command to initialize the configuration metadevice
- D. run the vxinstall utility to initialize the volume manager software for use
- E. create a soft partition using the -s initialize option with the appropriate command

Answer: A

3. You have two 50-MByte UFS file systems, one located on a single disk, and the other located on a RAID 1 mirror. Both file systems are full. The RAID 1 mirror uses a round-robin read policy. Statistically, which is true of the RAID 1 mirror when reading data?

- A. The mirror is faster.
- B. The mirror is slower.
- C. Round-robin read policies are not allowed.
- D. The mirror and single disk exhibit the same performance.

Answer: A

4. Which command should be used to create a file system on a virtual volume (d0) under Solaris Volume Manager control?

- A. newfs /dev/rdsk/d0
- B. newfs /dev/rdsk/md/d0
- C. newfs /dev/md/rdsk/d0
- D. newfs -F sds /dev/rdsk/d0

Answer: C

5. Interlace size is a tunable parameter associated with which three levels of RAID? (Choose three.)

- A. RAID 0
- B. RAID 1
- C. RAID 5
- D. RAID 0+1

Answer: ACD

6. Solaris Volume Manager offers advantages over storing data in traditional disk slices. What are two of these advantages? (Choose two.)

- A. It facilitates the rotational interleaving of data.
- B. It enables the definition of disk usage patterns.
- C. It offers the possibility of significant performance improvement.
- D. It manages the data to ensure that disk failure does not automatically lead to data loss.

Answer: CD

7. You are working on a system connected to the network. You are attempting to access a currently mounted NFS directory. Your system displays the message:

```
nfs mount: host1: : NFS: Service not responding
```

```
nfs mount: retrying: /usr/share/man
```

What can you do to solve this problem?

- A. ensure that nfsd is running on the NFS server
- B. ensure that mountd is running on the NFS server
- C. send a HUP signal to inetd process on the NFS server
- D. send a HUP signal to the rpcbind process on the NFS server

Answer: A

8. Which two are functions of an NFS client? (Choose two.)

- A. runs the nfsd daemon
- B. makes resources available over the network
- C. mounts remote resources across the network
- D. is configured using the /etc/dfs/dfstab file
- E. mounts a remote resource and uses it as though it were local

Answer: CE

9. You are working on a system connected to the network. You attempt to access a directory which you know is provided to your system using NFS, and which you have not accessed for some time. Your system displays the message:

```
stale NFS file handle
```

What is a possible cause of this problem?

- A. The lockd daemon on the local system is no longer running.

- B. The mountd daemon on the local system has out of date configuration information.
- C. The automountd daemon has not been informed of changes to the automount maps.
- D. The file or directory has been removed on the NFS server without the client's knowledge.

Answer: D

10. You want to automatically mount an NFS resource. You also want to mount the NFS resource so that if the server becomes unavailable, and the client reboots, system initialization will continue without waiting for the resource to mount. Which mount option can be added to the client's /etc/vfstab file to achieve this?

- A. fg
- B. ro
- C. bg
- D. intr
- E. soft
- F. hard

Answer: C

11. You are receiving error messages that the /lard file system is full. You check and see that it has a large file called swapfile. Your system has more than enough swap space. You suspect that the file is in use as swap space. Which sequence of commands confirms that the file was in use as swap space, and helps correct the file system problem?

- A. swap -r /lard/swapfile ; rm /lard/swapfile
- B. swap -l ; swap -d /lard/swapfile ; rm /lard/swapfile
- C. swap -l ; rm /lard/swapfile ; swap -d /lard/swapfile
- D. swap -l ; swap -r /lard/swapfile ; rm /lard/swapfile

Answer: B

12. You have a system used for application development. The process app-rev23 owned by user epiphylla terminates abnormally. Which two effects can the root user configure? (Choose two.)

- A. The process app-rev23 produces no core file at all.
- B. The process app-rev23 produces a core file without the string "core" appearing anywhere within the file name.
- C. The process app-rev23 produces a global core file readable by any user in a global /var/corefiles directory.
- D. The process app-rev23 produces a total of three core files, one in the current directory of the process, one in epiphylla's home directory, and one in a global /var/corefiles directory.

Answer: AB

13. The default run level is 3 and the host is configured as an NFS server with valid entries in /etc/dfs/dfstab. Which two command strings restart NFS services? (Choose two.)

- A. init 6
- B. pkill -HUP inetd
- C. /etc/init.d/nfs.server restart
- D. /etc/init.d/nfs.server stop;/etc/init.d/nfs.server start

Answer: AD

14. The auto_home automount map is an example of which type of map?

- A. xfn
- B. direct
- C. master
- D. generic
- E. indirect

Answer: E

15. The /etc/dfs/dfstab file on your Solaris system contains the entries:

```
share -o log=global /export/home
```

```
share -o ro /opt/NSCPcom
```

What is the purpose of the entry global?

- A. It specifies that all NFS transactions are logged in the /var/adm/global file.
- B. It specifies the tag to send to the syslogd daemon when logging the NFS share.
- C. It specifies the logging configuration to use from the NFS logging configuration file.
- D. It specifies the file in the /export/home directory in which to record NFS mount requests.

Answer: C

16. After creating and adding additional swap space, what should you do to ensure that the swap space is available following subsequent reboots?

- A. You add it as a line entry to the /etc/vfstab file.
- B. You modify the startup scripts to include a swap add command.
- C. The additional swap space cannot be made available following subsequent reboots.
- D. No additional steps are required because the necessary changes are made to the startup file when the swap space is added.

Answer: A

17. Under which two conditions will the automounter automatically mount resources listed in an AutoFS direct map? (Choose two.)

- A. only if the mount point has first been created
- B. only if the resources are to be mounted read-only
- C. only if the reference used in the direct map uses relative path names
- D. only if an entry for the direct map has been added to the master map

E. only if the reference used in the direct map uses absolute path names

Answer: DE

18. What can be added to the /etc/vfstab file to automatically mount the /var directory from the NFS server saturn onto the mount point /test during boot?

- A. /var - /test nfs - yes -
- B. saturn:/var - /test - yes -
- C. saturn:/var - /test nfs - yes
- D. saturn:/var /test nfs yes
- E. saturn:/var - /test nfs - yes -

Answer: E

19. An inexperienced administrator reports to you that they would like to see if a system is a functioning native LDAP client. You suggest that they run a command to verify that the system is configured as a native LDAP client. Which command should you suggest?

- A. Idaplist
- B. Idapclient -v
- C. Idapadd client
- D. Idapsearch client

Answer: A

20. While configuring NIS on a system, you execute the command string:

```
# domainname testlab.Region.Org.COM
```

Which two statements about this command are true? (Choose two.)

- A. The server's name is testlab, and it resides in the region.org.com domain.
- B. Executing this command populates the /etc/defaultdomain file with the domain name.
- C. The domain name is case sensitive, and must be configured exactly as specified on this command-line.
- D. The domain name is the entire character string testlab.Region.Org.COM, and no DNS domain is specified.

Answer: CD

Visualexams.com was founded in 2006. The safer,easier way to help you pass any IT Certification exams . We provide high quality IT Certification exams practice questions and answers(Q&A). Especially Adobe, Apple, Citrix, Comptia, EMC, HP, HuaWei, LPI, Nortel, Oracle, SUN, Vmware and so on. And help you pass any IT Certification exams at the first try.
