Latest Version

We are constantly reviewing our products. New material is added and old material is revised. Free updates are available for 90 days after the purchase. You should check your member zone at VisualExams and update 3-4 days before the scheduled exam date.

Here is the procedure to get the latest version:

1. Go to <http://www.visualexams.com/>
2. Log in the **User Center**
3. The latest versions of all purchased products are downloadable from here. Just click the links.

Feedback

If you spot a possible improvement then please let us know. We always interested in improving product quality.

Feedback should be send to Visualexams@hotmail.com. You should include the following: Exam number, version, page number, question number, and your login Account.

Our experts will answer your mail promptly.

Explanations

This product does not include explanations at the moment. If you are interested in providing explanations for this exam, please contact Visualexams@hotmail.com.

Features

- Comprehensive questions with complete details
- Instant Downloadable in PDF form.
- Verified Answers Researched by Industry Experts
- Questions accompanied by exhibits.
- Drag and Drop questions as experienced in the Actual Exams.
- These questions and answers are backed by our GUARANTEE.
- Questions updated on regular basis.
- Like actual certification exams our product is in multiple-choice questions (MCQs)

Commitment to Your Success: At VisualTestExam.com, we are committed to you ongoing success. Our exams and questions are constantly being updated and compared to industry standards.

Want to earn a Microsoft certification like MCSE, MCSE 2003, CCNA, CCNP? Thinking about getting an A+ or CCSP?

A, CCSP or Network+ Certification with less effort and time. You will be astonished at the theoretical and practical knowledge you will acquire in such a short period of time using our Certification Training Products. Our Study material will enable you to pass your Microsoft, Your Cisco and any other certification on the very first attempt.

Guarantee

VisualExams provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if somehow you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

1. Is the following statement true or false? The username you use to connect to MySQL must be the same as the login used to access the operating system.

- A. true
- B. false

Answer: B

2. Which of the following statements are required to create a key cache of 4 MB, assign the MyISAM table world.City to it and preload the index?

- A. mysql> SET GLOBAL city_cache.key_buffer_size = 4194304;mysql> CACHE INDEX world.City IN city_cache;mysql> LOAD INDEX INTO CACHE world.City;
- B. mysql> ALTER TABLE world.city KEY_CACHE = 4194304;
- C. mysql> CREATE CACHE FOR world.City SIZE = 4194304;
- D. It is not possible to create a key cache for a specific MyISAM table, only the global key cache can be used.

Answer: A

3. How can the SHOW PROCESSLIST command be helpful when optimizing queries?

- A. It shows if a query is using an index or not.
- B. It shows how the server processes a query.
- C. If checked periodically, it can reveal queries that cause other queries to hang.
- D. It shows the percentage of processing power that each query is using on a server.

Answer: C

4. Consider the following:

```
mysql> EXPLAIN SELECT Name FROM Country WHERE Code = 'CAN\G
```

```
***** 1. row *****  
  
      id: 1  
  
select_type: SIMPLE  
      table: Country  
      type: const
```

possible_keys: PRIMARY

key: PRIMARY

key_len: 3

ref: const

rows: 1

Extra:

Which of the following best describes the meaning of the value of the type column?

- A. The table has exactly one row.
- B. Several rows may be read from the table.
- C. Only one row of all its rows need to be read.

Answer: C

5. Which of the following best describes why InnoDB tables should always have primary keys and why they should be short?

- A. Because InnoDB uses primary keys to locate tables, and shorter keys make quicker lookups.
- B. Because InnoDB uses primary keys to locate table rows, and shorter keys make quicker lookups.
- C. Because InnoDB stores pointers in a log to all the primary keys and shorter keys make this log smaller.

Answer: B

6. Which of the following best describes how the relay log works?

- A. It records the times when the slave connects to the master.
- B. When a slave receives a change from the master, it is recorded in the relay log first and processed later.
- C. When a slave receives a change from the master, it is processed first and then recorded in the relay log.

Answer: B

7. With replication, what on the master is used to send commands to the slave?

- A. The relay log.
- B. The binary log.
- C. The SQL Thread.

Answer: B

8. Given the following MyISAM table structure:

```
mysql> desc city;
```

```
+-----+-----+-----+-----+-----+-----+
| Field      | Type      | Null | Key | Default | Extra          |
+-----+-----+-----+-----+-----+-----+
| ID         | int(11)   |      | PRI | NULL     | auto_increment |
| Name       | char(35)  |      |     |          |                |
| CountryCode | char(3)   |      |     |          |                |
| District   | char(20)  |      |     |          |                |
| Population | int(11)   |      | MUL | 0        |                |
+-----+-----+-----+-----+-----+-----+
```

and the following SQL statement:

```
SELECT Population
FROM city
WHERE Population = 10000
ORDER BY Population
LIMIT 5;
```

which of the following statements best describes how MySQL optimizer executes the query?

- A. The optimizer uses the primary key column ID to read the index values, then uses the index on Population to filter the results. The optimizer will always choose to use a unique index first, then use a secondary index if available.
- B. The optimizer uses the index on the Population column to search and filter the WHERE clause. A temporary table is used to perform a filesort on the results, and then only 5 records are returned to the client.
- C. The optimizer uses the index on the Population column to search, filter and sort the Population column, then returns 5 records to the client. The optimizer does not need to read the data rows, and can return values from the index only, because the index contains just integer values that form a leftmost prefix for the key.

D. The optimizer uses the index on the Population column to search, filter and sort the Population column, and returns 5 records to the client. The optimizer does not need to read the data rows, and can return values from the index only because only those columns were specified in the SELECT statement.

E. The optimizer will never read data from disk, since MySQL caches both data and index in the key buffer.

Answer: D

9. The stored function year_to_date is created by the 'root'@'localhost' account as follows:

```
CREATE FUNCTION year_to_date ()  
RETURNS DECIMAL(10,2)  
SQL SECURITY DEFINER  
BEGIN  
...  
END;
```

Within the routine body, a number of calculations are made on data in the financials table and the calculated value is returned. The only account which can access the financials table is 'root'@'localhost'.

If a client connects with the account 'joe'@'localhost' and calls the year_to_date function, what will happen?

A. The function will always execute as if it was 'root'@'localhost' that invoked it since SQL SECURITY DEFINER has been specified.

B. The function will not execute, as 'joe'@'localhost' does not have access to the financials table

C. The function will not execute as SQL SECURITY DEFINER has been specified. It would execute if instead SQL SECURITY INVOKER had been specified

D. If the account 'joe'@'localhost' has the EXECUTE privilege on year_to_date, the function will complete successfully

Answer: D

10. How can stored routines be used to check for constraints or legality of incoming data?

A. They can make use of the VALIDATE DEFINER setting.

B. They can not be used to check for constraints or legality of data.

C. They can check and only perform an action if the incoming values match a specified value.

Answer: C

11. Which of the following statements about the slow query log is true?

- A. The slow query log will always contain just slow queries.
- B. The slow query log may not always contain just slow queries.
- C. The slow query log always logs more than just slow queries.

Answer: B

12. When working with stored routines, which of the following are true in regards to the effect on the amount of data exchanged between client and server?

- A. They may increase the amount of data exchanged.
- B. They can help reduce the amount of data exchanged.
- C. They have no effect on the amount of data exchanged.

Answer: B

13. Which of the following statements are true of how access control is based?

- A. It is based off of an access control table in the mysql database.
- B. It is based off of grant tables in the mysql database.
- C. It is based off of an access control list stored in the data directory.
- D. It is based off of an access control list stored inside the .frm files of each table.

Answer: B

14. Consider the following GRANT statement:

```
GRANT USAGE ON *.* TO 'kofi'@'localhost' IDENTIFIED BY 'password'
```

What is the implications of executing that statement?

- A. Kofi can access all database objects.
- B. Kofi can access all his tables.
- C. Kofi can display server system and status variables.
- D. Kofi can grant privileges to others.
- E. Kofi can access all database objects belonging to localhost.

Answer: C

15. Consider the following query:

```
GRANT ALL ON world.* TO 'web'@'hostname'
```

What privileges would this give this user?

- A. All privileges including GRANT.
- B. All privileges except GRANT.
- C. SELECT, INSERT, UPDATE and DELETE.
- D. ALL can not be used when granting privileges.

Answer: B

Visualexams.com was founded in 2006. The safer,easier way to help you pass any IT Certification exams . We provide high quality IT Certification exams practice questions and answers(Q&A). Especially Adobe, Apple, Citrix, Comptia, EMC, HP, HuaWei, LPI, Nortel, Oracle, SUN, Vmware and so on. And help you pass any IT Certification exams at the first try.
