

Exam : Cisco 642-971

**Title : Data Center Networking
Infrastructure Design
Specialist**

Version : Demo

Important Note, Please Read Carefully

Other VisualExams products

[All visual exams IT Exam Products](#)

Our products of Offline Testing Engine

Use the offline Testing engine product to practice the questions in an exam environment.

Build a foundation of knowledge which will be useful also after passing the exam.

Latest Version

We are constantly reviewing our products. New material is added and old material is revised. Free updates are available for 90 days after the purchase. You should check your member zone at VisualExams and update 3-4 days before the scheduled exam date.

Here is the procedure to get the latest version:

1. Go to <http://www.visual exams.com/>
2. Log in the **User Center**
3. The latest versions of all purchased products are downloadable from here. Just click the links.

Feedback

If you spot a possible improvement then please let us know. We always interested in improving product quality.

Feedback should be send to Visual exams@hotmail.com. You should include the following: Exam number, version, page number, question number, and your login Account.

Our experts will answer your mail promptly.

Explanations

This product does not include explanations at the moment. If you are interested in providing explanations for this exam, please contact Visual exams@hotmail.com.

Features

- Comprehensive questions with complete details
- Instant Downloadable in PDF form.
- Verified Answers Researched by Industry Experts
- Questions accompanied by exhibits.
- Drag and Drop questions as experienced in the Actual Exams.
- These questions and answers are backed by our GUARANTEE.
- Questions updated on regular basis.
- Like actual certification exams our product is in multiple-choice questions (MCQs)

Commitment to Your Success: At VisualTestExam.com, we are committed to you ongoing success. Our exams and questions are constantly being updated and compared to industry standards.

Want to earn a Microsoft certification like MCSE, MCSE 2003, CCNA, CCNP? Thinking about getting an A+ or CCSP?

A, CCSP or Network+ Certification with less effort and time. You will be astonished at the theoretical and practical knowledge you will acquire in such a short period of time using our Certification Training Products. Our Study material will enable you to pass your Microsoft, Your Cisco and any other certification on the very first attempt.

Guarantee

VisualExams provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if somehow you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

1. What advantage does InfiniBand have over Gigabit Ethernet in HPC environments?

- A. lower latency
- B. simpler cabling
- C. longer distance support
- D. more sophisticated traffic management

Answer: A

2. Which data center network-architecture change is a result of the adoption of blade and 1-RU server technologies?

- A. Layer 3 fault domains growing larger
- B. Layer 2 fault domains growing larger
- C. Layer 3 fault domains growing smaller
- D. Layer 2 fault domains growing smaller

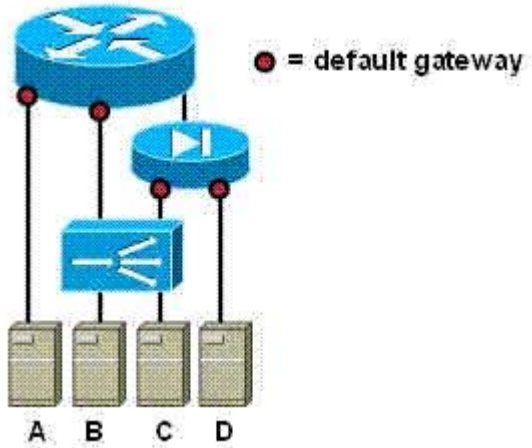

Answer: B

3. A very large blade-server deployment has high throughput requirements for both data and storage networks. Which access layer option would you recommend?

- A. blade server Ethernet switch with Cisco SFS 3000 Series Multifabric Switch
- B. blade server InfiniBand switch with Cisco SFS 3000 Series Multifabric Switch
- C. blade server Ethernet switch that is connected to Cisco Catalyst 4948 top-of-rack switch
- D. blade server Ethernet switch that is connected to Cisco Catalyst 6500 Series end-of-rack switch

Answer: B

4. Refer to the exhibit. Each letter (A-D) represents a model for placement of a default gateway. Which model allows the maximum number of application and security services?

- A. model A
- B. model B
- C. model C
- D. model D

Answer: C

5. Which three of the following service modules can be deployed in redundant pairs with active/active failover? (Choose three.)

- A. ACE
- B. CSM
- C. NAM
- D. IDSM
- E. FWSM
- F. SSLSM

Answer: ADE

6. Refer to the exhibit. What do you need to configure to prevent spanning-tree loops from occurring between the two FWSMs?

- A. FWSMs in transparent mode
- B. ethertype ACLs to allow BPDUs
- C. FWSMs in multiple-context mode
- D. failover and state interfaces on the same VLAN

Answer: B

7. How is FCIP traffic marked with DSCP values?

- A. The Cisco MDS 9000 Series Multilayer Switch marks one DSCP value per FCIP tunnel.
- B. The Cisco MDS 9000 Series Multilayer Switch marks two DSCP values per FCIP tunnel.
- C. The aggregation layer Ethernet switch marks one DSCP value per FCIP tunnel.
- D. The aggregation layer Ethernet switch marks two DSCP values per FCIP tunnel.

Answer: B

8. Which two security vulnerabilities does the FWSM application inspection engine mitigate? (Choose two.)

- A. DoS attacks
- B. DDoS attacks
- C. SQL injection
- D. cookie altering
- E. web server worms

Answer: CD

9. Your customer plans to deploy FWSM and IDSM modules in the aggregation layer. Which design should you avoid?

- A. Layer 3
- B. InfiniBand
- C. Layer 2 loop-free
- D. Layer 2 looped square
- E. Layer 2 looped triangle

Answer: A

10. Refer to the exhibit.

Your customer is filling server racks sequentially, filling one rack before beginning the next. Which two access layer designs present challenges in this environment? (Choose two.)

- A. Layer 3
- B. Layer 2 loop-free U
- C. Layer 2 looped square
- D. Layer 2 looped triangle
- E. Layer 2 loop-free inverted U

Answer: AB

11. You are a Cisco engineer of TestInside.com. You are implementing the Cisco Nexus environment for the company, so which two are requirements of FCoE in it? (Choose two.)

- A. Spanning Tree Protocol
- B. Use of jumbo frames
- C. TCP-driven retransmissions for flow control
- D. IEEE 802.3x extensions to enable lossless Ethernet

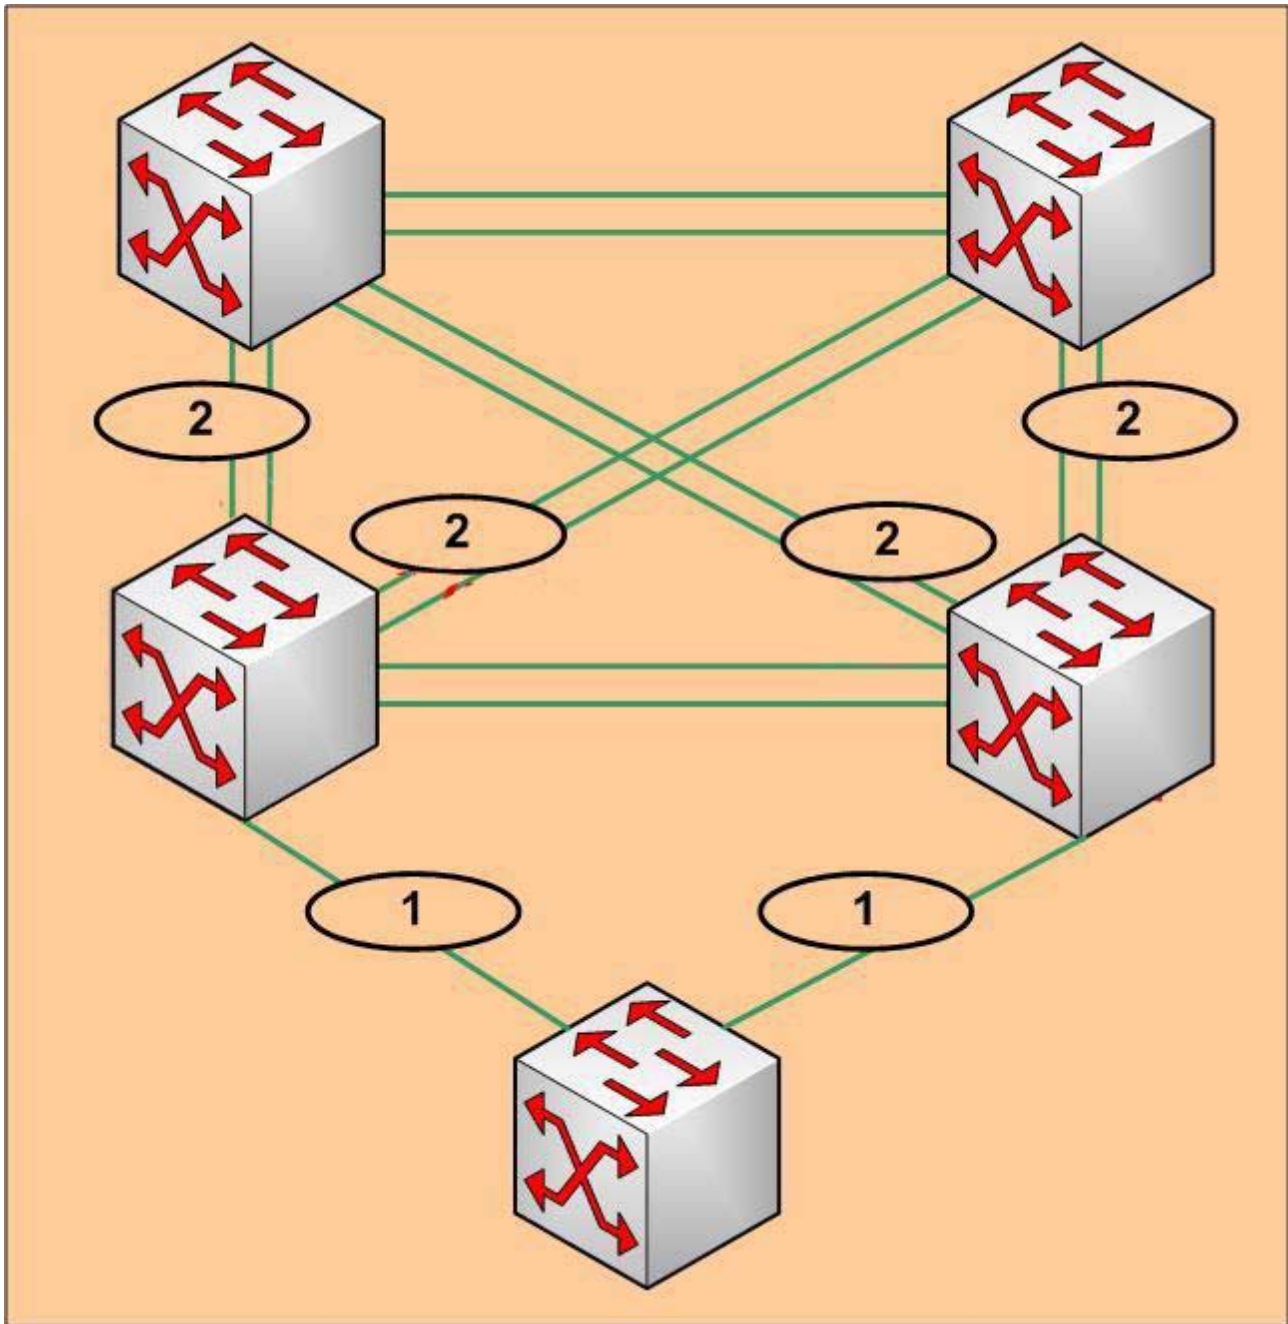

Answer: BD

12. You are the senior desktop administrator for TestInside.com. You are deploying network for the company. With your experience, which of following two Cisco service modules can be implemented in redundant pairs with active-active failover? (Choose two.)

- A. Cisco network analysis module
- B. Cisco ACE Application Control Engine
- C. Cisco Firewall Services Module (FWSM)
- D. Cisco Catalyst 6500 Series SSL Services Module (CVDM-SSLSM)

Answer: BC

13. You are a Cisco engineer of TestInside.com. You are configuring the network for the company. The numbers in the ovals stand for the number of ports in each PortChannel(Refer to the exhibit). If VSS is deployed in the top four switches, as far as you know, how many ports at most that the virtual PortChannel in the core can have ?

- A. two
- B. four
- C. six
- D. eight

Answer: D

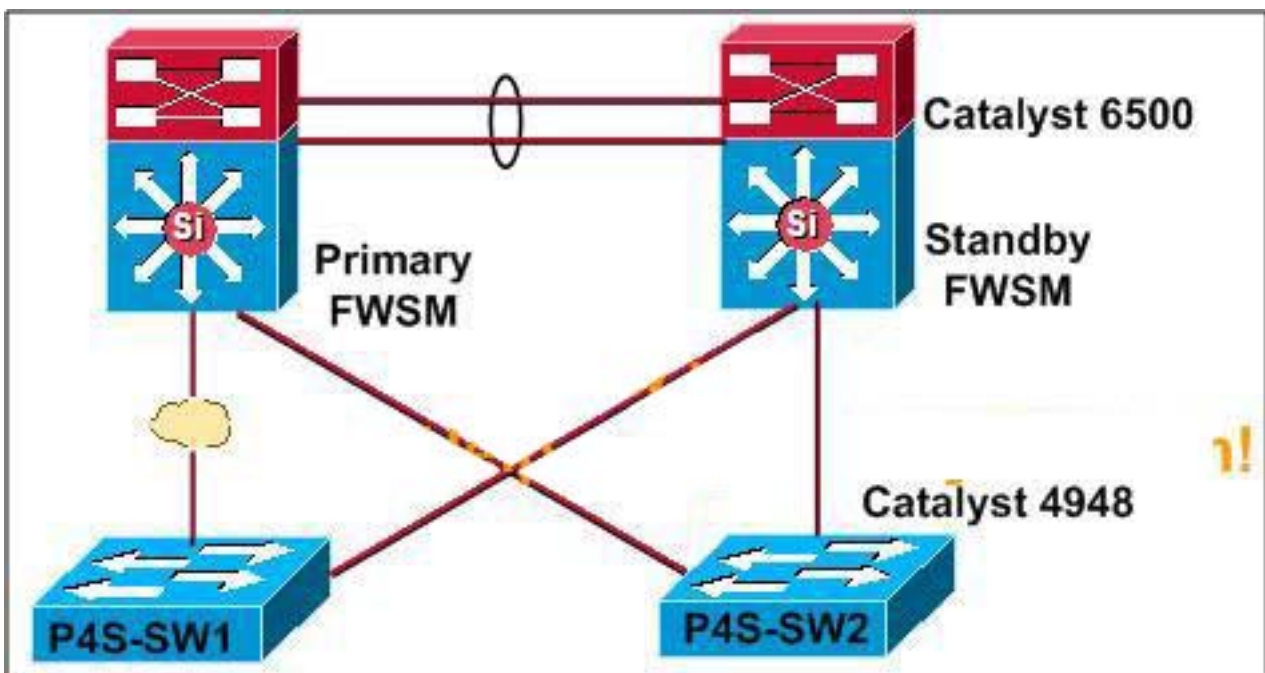

14. Which service module configuration is recommended to automatically detect and block traffic from malicious hosts?

- A. FWSM

- B. IDSM that is deployed in IDS mode
- C. IDSM that is deployed in IPS mode
- D. FWSM that is coupled with the NAM

Answer: C

15. You are the senior desktop administrator for TestInside.com. A customer met a trouble: A failure occurs on one of the access layer uplinks(Refer to the exhibit). With your experience, which Layer 2 topology can cause a break in connectivity between the FWSMs?

- A. looped square
- B. looped triangle
- C. loop-free U
- D. loop-free inverted U

Answer: C

16. You work as the network administrator at TestInside.com. And you are familiar with Cisco product, so as much as you know, which Cisco product is implemented for content routing purposes?

- A. Cisco ACE GSS
- B. Cisco ACE Module
- C. Cisco ACE appliance

D. Cisco Catalyst 6500 Series Switches

Answer: A

17. You work as a systems administrator at TestInside.com. You deploy the network for the company by using the default VDC high availability options in the Cisco Nexus 7010 Switch, what will happen then?

- A. The VDC is deleted, and no further action is performed.
- B. If dual supervisors are in use, a supervisor switchover is forced.
- C. The VDC is deleted and then re-created with the startup configuration.
- D. If a single supervisor is in use, a graceful restart is forced.

Answer: B

18. You are a help desk trainee for TestInside.com. One of your customers use the Cisco SFS family of products to provide server-side InfiniBand integration, but as far as you know, which two Cisco products should be implemented to make up the solution? (Choose two.)

- A. Fibre Channel Host Channel Adapters
- B. InfiniBand switch modules
- C. Fibre Channel switch modules
- D. InfiniBand HCA card for IBM and Dell servers

Answer: BD

19. You work as a systems administrator at TestInside.com. In order to realize to service multicast traffic in a data center environment, what three of following options are effective ways? (Choose three.)

- A. deploying VRFs per address family
- B. configuring service modules in transparent or bridged mode
- C. configuring IGMP/PIM in the Cisco Catalyst 6500 Series FWSM
- D. configuring IGMP/PIM in the MSFC on a Cisco Catalyst 6500 switch

Answer: BCD

20. Which problem can result from end-of-rack designs?

- A. lower reliability
- B. airflow restriction

- C. more devices to manage
- D. complex spanning-tree design

Answer: B

Visualexams.com was founded in 2006. The safer,easier way to help you pass any IT Certification exams . We provide high quality IT Certification exams practice questions and answers(Q&A). Especially Adobe, Apple, Citrix, Comptia, EMC, HP, HuaWei, LPI, Nortel, Oracle, SUN, Vmware and so on. And help you pass any IT Certification exams at the first try.
