Latest Version

We are constantly reviewing our products. New material is added and old material is revised. Free updates are available for 90 days after the purchase. You should check your member zone at VisualExams and update 3-4 days before the scheduled exam date.

Here is the procedure to get the latest version:

1. Go to <http://www.visual exams.com/>
2. Log in the **User Center**
3. The latest versions of all purchased products are downloadable from here. Just click the links.

Feedback

If you spot a possible improvement then please let us know. We always interested in improving product quality.

Feedback should be send to Visual exams@hotmail.com. You should include the following: Exam number, version, page number, question number, and your login Account.

Our experts will answer your mail promptly.

Explanations

This product does not include explanations at the moment. If you are interested in providing explanations for this exam, please contact Visual exams@hotmail.com.

Features

- Comprehensive questions with complete details
- Instant Downloadable in PDF form.
- Verified Answers Researched by Industry Experts
- Questions accompanied by exhibits.
- Drag and Drop questions as experienced in the Actual Exams.
- These questions and answers are backed by our GUARANTEE.
- Questions updated on regular basis.
- Like actual certification exams our product is in multiple-choice questions (MCQs)

Commitment to Your Success: At VisualTestExam.com, we are committed to your ongoing success. Our exams and questions are constantly being updated and compared to industry standards.

Want to earn a Microsoft certification like MCSE, MCSE 2003, CCNA, CCNP? Thinking about getting an A+ or CCSP?

A, CCSP or Network+ Certification with less effort and time. You will be astonished at the theoretical and practical knowledge you will acquire in such a short period of time using our Certification Training Products. Our Study material will enable you to pass your Microsoft, Your Cisco and any other certification on the very first attempt.

Guarantee

VisualExams provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if somehow you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

1. A hacker initiates an attack that floods the network, overwhelming the company server, router, firewall, or network. Legitimate traffic cannot be processed, and the company cannot function. This causes which security pain point?

- A. DDoS attack
- B. application security
- C. theft of information
- D. Day Zero attack

Answer:A

2. Which Cisco Security Solution helps organizations to effectively avoid disruptions that are caused by worms or viruses, while also helping to control the costs of deploying and maintaining a secure network?

- A. CiscoWorks VPN/Security Management Solution
- B. Cisco Security Monitoring, Analysis and Response System
- C. Theft of Information Solution
- D. Outbreak Prevention Solution

Answer:D

3. NAC is an example of which principal characteristic of the Cisco SDN?

- A. adaptation
- B. collaboration
- C. differentiation
- D. integration

Answer:B

4. Once you have concluded the discovery process, you will set up a meeting with the final decision maker and present the value proposition. Which two items would you include in your value proposition? (Choose two.)

- A. qualitative information about how Cisco can help to increase revenue and reduce costs
- B. a high-level review of the Cisco Security portfolio and how it differs from competitive offerings
- C. a detailed review of the proposed technological enhancements that are provided in the security solution design
- D. an analysis of the security-market business trends and related Cisco solution offerings
- E. a review of customer security pain points and business needs that you learned about during the discovery process

Answer:AE

5. No one buys security for security itself: customers must be able to realize the benefits. Which three benefits can Cisco Security Solutions provide to customers? (Choose three.)

- A. network convergence

- B. increased profitability
- C. zero percent of the network downtime
- D. extended network access
- E. compliance with government regulations
- F. bandwidth optimization

Answer:BDE

6.Which business enabler provides a defense against damages and losses (such as financial, legal, commercial, image, branding, property, and people), which directly affect the ability of a company to do business?

- A. government regulations
- B. protection
- C. ubiquitous access
- D. contribution to profitability

Answer:B

7.You are meeting with a customer who is concerned about ongoing network threats and vulnerabilities within the corporate network. How should you position the Cisco SDN with this customer?

- A. The Cisco Self-Defending Network is the Cisco solution that protects the network of an organization. The SDN strategy offers security products that will defend your network before attacks occur. SDN products use industry-leading technologies, which will enable your company to stay up to date on network security.
- B. Cisco NAC is a complete, end-to-end security solution that enables endpoints to be admitted to the network based on their adherence to security policy as enforced by network devices, such as routers and switches. NAC is a solution that will protect business processes and the network of your organization by identifying, preventing, and adapting to security threats.
- C. Cisco SDN solutions are adaptive, allowing for innovative behavioral methods to be deployed in order to automatically recognize new types of threats as they arise. Mutual awareness can exist among and between security services and network intelligence, thus increasing security effectiveness and enabling a much more proactive response to new types of threats.
- D. Most network threats and vulnerabilities arise from inefficient access control. Cisco VLAN solutions are a part of the Self-Defending Network strategy, and can segment users into different workgroups or virtual LANs based on whom they are, not where they are. In turn, VLAN solutions prohibit hackers from gaining network access, and will dramatically lessen the pains you are experiencing with network threats and vulnerabilities.

Answer:C

8.You are meeting with a customer who is concerned about remote employees connecting to the network with infected systems and spreading infection across the corporate network. How should you position the

Cisco SDN with this customer?

- A. The Cisco Self-Defending Network includes NAC, which evaluates devices that may not have the latest antivirus software or operating system patch, and either denies access to those devices or quarantines them.
- B. The Cisco Self-Defending Network includes integration, which enables a more proactive response to threats with greater operational efficiency through the consolidation of multiple security services on the devices.
- C. The Cisco Self-Defending Network is adaptive, distributing security technologies throughout every segment of the network to enable every network element as a point of defense.
- D. The Cisco Self-Defending Network provides technologies that have intelligent insight into what is running on computers, so there is no possible way for remote employees to connect to the network with infected systems.

Answer:A

9. In which two ways does application security protect against threats being introduced from within web-enabled applications? (Choose two.)

- A. Application security examines message-level information to ascertain the "intent" of the applications.
- B. Application security provides controls that limit the transmission of confidential data or policies.
- C. Application security intelligently analyzes network payload.
- D. Application security stops attacks as far as possible from their intended destination and the core of the network.
- E. Application security provides sophisticated auditing, control, and correlation capabilities to control and protect any networked element.

Answer:AC

10. How does Anti-X defense stop attacks as far as possible from their intended destination and the core of the network?

- A. Anti-X defense examines message-level information to ascertain the "intent" of the applications.
- B. Anti-X defense intelligently analyzes network payload.
- C. Anti-X defense distributes mitigation points throughout key security-enforcement points in the network.
- D. Anti-X defense provides sophisticated auditing, control, and correlation capabilities to control and protect any networked element.

Answer:C

11. Network containment and control provides the ability to layer sophisticated auditing, control, and correlation capabilities to protect any networked element across any firewall, VPN, intrusion detection mechanism, or other technology. How does this enable proactive response to threats?

- A. It distributes mitigation points throughout key security-enforcement points in the network.

- B. It examines message-level information to ascertain the "intent" of the applications.
- C. It provides controls that limit the transmission of confidential data or policies.
- D. It aggregates and correlates security information.

Answer:D

12.What is the most common reason that customers lack sufficient security?

- A. Customers have not adequately analyzed their strategies and implementations.
- B. Customers see security devices as easily sidestepped and their networks threatened anyway.
- C. Customers have not appropriately assessed the size and scalability of their network structures.
- D. Customers do not trust in innovative solution technologies that will protect their networks.

Answer:A

13.Which threat can be traced back to the outbreak prevention pain point?

- A. protocol manipulation
- B. user or administrator errors
- C. attacks through permitted traffic
- D. reconnaissance probes

Answer:C

14.A Cisco Outbreak Prevention Solution provides customers with many benefits. Within this solution, which type of Cisco network security offering acts as the first line of defense to proactively isolate infections by preventing worms or viruses from infiltrating endpoints?

- A. NIPS
- B. HIPS
- C. Cisco IOS infrastructure security
- D. Cisco antivirus software

Answer:B

15.Which threat can be traced back to the application abuse pain point?

- A. Day Zero worms and viruses
- B. DoS attacks
- C. unauthorized user access
- D. operational complexities
- E. protocol manipulation

Answer:E

Visualexams.com was founded in 2006. The safer,easier way to help you pass any IT Certification exams . We provide high quality IT Certification exams practice questions and answers(Q&A). Especially Adobe, Apple, Citrix, Comptia, EMC, HP, HuaWei, LPI, Nortel, Oracle, SUN, Vmware and so on. And help you pass any IT Certification exams at the first try.
