

**Exam : Nortel 920-220**

**Title : Nortel Converged Campus  
ERS Solution**

**Version : Demo**

## Important Note, Please Read Carefully

### Other VisualExams products

[All visualexams IT Exam Products](#)

### Our products of Offline Testing Engine

Use the offline Testing engine product to practice the questions in an exam environment.

Build a foundation of knowledge which will be useful also after passing the exam.

### Latest Version

We are constantly reviewing our products. New material is added and old material is revised. Free updates are available for 90 days after the purchase. You should check your member zone at VisualExams and update 3-4 days before the scheduled exam date.

Here is the procedure to get the latest version:

1. Go to <http://www.visualexams.com/>
2. Log in the **User Center**
3. The latest versions of all purchased products are downloadable from here. Just click the links.

### Feedback

If you spot a possible improvement then please let us know. We always interested in improving product quality.

Feedback should be send to [Visualexams@hotmail.com](mailto:Visualexams@hotmail.com). You should include the following: Exam number, version, page number, question number, and your login Account.

Our experts will answer your mail promptly.

### Explanations

This product does not include explanations at the moment. If you are interested in providing explanations for this exam, please contact [Visualexams@hotmail.com](mailto:Visualexams@hotmail.com).

### Features

- Comprehensive questions with complete details
- Instant Downloadable in PDF form.
- Verified Answers Researched by Industry Experts
- Questions accompanied by exhibits.
- Drag and Drop questions as experienced in the Actual Exams.
- These questions and answers are backed by our GUARANTEE.
- Questions updated on regular basis.
- Like actual certification exams our product is in multiple-choice questions (MCQs)

**Commitment to Your Success: At VisualTestExam.com, we are committed to you ongoing success. Our exams and questions are constantly being updated and compared to industry standards.**

Want to earn a Microsoft certification like MCSE, MCSE 2003, CCNA, CCNP? Thinking about getting an A+ or CCSP?

A, CCSP or Network+ Certification with less effort and time. You will be astonished at the theoretical and practical knowledge you will acquire in such a short period of time using our Certification Training Products. Our Study material will enable you to pass your Microsoft, Your Cisco and any other certification on the very first attempt.

## **Guarantee**

Visualexams provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if somehow you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

1. The Redundant Power Supply 15 (RPS15) will provide protection against which failure scenario?

- A. rolling blackouts
- B. power loss to the entire building
- C. failure of the primary AC power supply on the switch
- D. regional power surges and drops

**Answer: C**

2. A customer is using an Ethernet Routing Switch (ERS) 8300 to provide Power-over-Ethernet (PoE). They have recently purchased a number of devices that require PoE, and need to increase the PoE capacity on the 8300. They currently have one 8302AC power supply in the 8300 chassis and are not concerned with redundancy. Which procedure is required to provide the most amount of power?

- A. Install two additional 8301AC power supplies connected to 220V input.
- B. Install one additional 8302 AC power supply connected to 220V input.
- C. Install two additional 8302 AC power supplies connected to 220V input.
- D. Install three 8301AC power supplies connected to 220V input.

**Answer: D**

3. A customer is implementing video conferencing devices that require Power-over-Ethernet (PoE). They are planning to use an Ethernet Routing Switch (ERS) 8310 chassis for this deployment. They would also like to install 8600 modules in the chassis. Which statement about this customer scenario is true?

- A. Both PoE and 8600 modules are supported in the 8310 chassis.
- B. Neither PoE or 8600 modules are supported in the 8310 chassis.
- C. The 8310 chassis does not support PoE, but will support 8600 modules.
- D. PoE can be supplied via the 8310 chassis, but will not support 8600 modules.

**Answer: D**

4. A customer is implementing Ethernet Routing Switch (ERS) 5500 series. The deployment scenario requires fiber links that will support 10 Gbps transmission speeds to a Data Center 30 Km away. Which switch and transceivers meet this requirement?

- A. ERS 5510 with 10GBASE-ER XFP transceivers
- B. ERS 5530 with 10GBASE-SR XFP transceivers
- C. ERS 5520 with 10GBASE-SR XFP transceivers
- D. ERS 5530 with 10GBASE-ER XFP transceivers

**Answer: D**

5. Which multicast technology used with the Ethernet Routing Switch allows the router to determine whether any group members exist on its directly-attached networks and switches?

- A. IGAP
- B. IGMP

- C. DVMRP
- D. PIM-SM

**Answer: B**

6. A network employs the autonegotiation feature, and you are getting many Excessive Frame Check Sequence (FCS) errors. What is the probable cause for these errors?

- A. RFI and FEFI for 100-FX connections is enabled.
- B. Autonegotiation on the server and corresponding switch port is disabled.
- C. Autonegotiation on one end of the link is enabled and disabled on the other end.
- D. Autonegotiation on the switch-to-switch ports is enabled.

**Answer: C**

7. A customer needs a network architecture that provides sub-second failover and that ensures that multimedia and IP telephony will function flawlessly in the event of a single point of network failure. Which network design feature would you recommend?

- A. Switch clustering with SMLT
- B. Autonegotiation
- C. Link Aggregation Protocol
- D. Distributed MLT

**Answer: A**

8. A network configuration is using MLT-based SMLT switch clustering. You want to simplify troubleshooting on the network. Which network design practice will help simplify troubleshooting operations?

- A. Verify that all VLANs participating in SMLT are tagged on both ends of the IST.
- B. Distribute physical IST connections between different modules in the chassis.
- C. Use the same ID number for the MLT group and corresponding SMLT group.
- D. Make sure that the VLACP timers are set to the same value on both ends of the link.

**Answer: C**

9. A network employs SMLT-based switch clustering in a square topology. The network design needs to control the amount of broadcast traffic and protect the CPU from being flooded by traffic from a single, unstable port. To indicate a potential issue on the network, what rate should be set for the CPLimitUtilRate?

- A. A value lower than the average network traffic rate.
- B. A value higher than the average network traffic rate.
- C. A value equal to the average network traffic rate.
- D. A value equal to or higher than the network traffic rate.

**Answer: B**

10. An engineer implemented a core network consisting of four Ethernet Routing Switch (ERS) 8600 systems and needs the ability to build a redundant core. Which feature would be used to provide

redundancy and fail-over times?

- A. Protocol Based VLANs
- B. Split Multi-Link Trunking
- C. Multi-Link Trunking
- D. Spanning Forest

**Answer: B**

Visualexams.com was founded in 2006. The safer,easier way to help you pass any IT Certification exams . We provide high quality IT Certification exams practice questions and answers(Q&A). Especially Adobe, Apple, Citrix, Comptia, EMC, HP, HuaWei, LPI, Nortel, Oracle, SUN, Vmware and so on. And help you pass any IT Certification exams at the first try.
