

Exam : Nortel 920-271

**Title : Nortel WLAN 2300 RIs.7.0
implementation &
Management**

Version : Demo

Important Note, Please Read Carefully

Other VisualExams products

[All visualexams IT Exam Products](#)

Our products of Offline Testing Engine

Use the offline Testing engine product to practice the questions in an exam environment.

Build a foundation of knowledge which will be useful also after passing the exam.

Latest Version

We are constantly reviewing our products. New material is added and old material is revised. Free updates are available for 90 days after the purchase. You should check your member zone at VisualExams and update 3-4 days before the scheduled exam date.

Here is the procedure to get the latest version:

1. Go to <http://www.visualexams.com/>
2. Log in the **User Center**
3. The latest versions of all purchased products are downloadable from here. Just click the links.

Feedback

If you spot a possible improvement then please let us know. We always interested in improving product quality.

Feedback should be send to Visualexams@hotmail.com. You should include the following: Exam number, version, page number, question number, and your login Account.

Our experts will answer your mail promptly.

Explanations

This product does not include explanations at the moment. If you are interested in providing explanations for this exam, please contact Visualexams@hotmail.com.

Features

- Comprehensive questions with complete details
- Instant Downloadable in PDF form.
- Verified Answers Researched by Industry Experts
- Questions accompanied by exhibits.
- Drag and Drop questions as experienced in the Actual Exams.
- These questions and answers are backed by our GUARANTEE.
- Questions updated on regular basis.
- Like actual certification exams our product is in multiple-choice questions (MCQs)

Commitment to Your Success: At VisualTestExam.com, we are committed to you ongoing success. Our exams and questions are constantly being updated and compared to industry standards.

Want to earn a Microsoft certification like MCSE, MCSE 2003, CCNA, CCNP? Thinking about getting an A+ or CCSP?

A, CCSP or Network+ Certification with less effort and time. You will be astonished at the theoretical and practical knowledge you will acquire in such a short period of time using our Certification Training Products. Our Study material will enable you to pass your Microsoft, Your Cisco and any other certification on the very first attempt.

Guarantee

Visualexams provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if somehow you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

1. A Nortel WLAN 2300 series network contains multiple WLAN Security Switches. One WLAN Security Switch is configured as the primary mobility domain seed. Another WLAN Security Switch is configured as the secondary mobility domain seed. If the primary mobility domain seed becomes unavailable, the secondary mobility domain seed is promoted to be the primary mobility domain seed.

When the original primary mobility domain seed becomes available again, what happens to the recently promoted secondary mobility domain seed?

- A.The secondary mobility domain seed remains in the promoted stated until the network administrator intervenes.
- B.The secondary mobility domain seed is automatically demoted back to its original state.
- C.The promoted secondary mobility domain seed remains as the permanent primary mobility domain seed.
- D.The mobility domain seed with the lowest IP address becomes the primary mobility domain seed.

Answer: B

2. The WLAN 2300 Management System allows a graphical view of site installations. It can also be used to monitor real time events in the Wireless LAN.

Which statement about the features of the WLAN 2300 Management System is true?

- A.It only runs on Linux.
- B.It runs on WLAN Security Switch.
- C.It offers web-based management.
- D.It offers pre-deployment planning and configuration.

Answer: D

3. A signal with a strength of 200 mW leaves an access point and travels through a cable with a loss of -3 dB.

Using the rule of 3s and 10s, calculate the power of the signal when it reaches the antenna.

- A.197 mW
- B.100 mW
- C.197 dB
- D.50 dB

Answer: B

4. An access point generates a 4 W signal; it is equipped with a cable that has a loss of 3 dB and an antenna with a gain of 10 dB.

What is the power radiated to the air?

A.40 W

B.2 W

C.20 W

D.10 W

Answer: C

5. A customer wants to calculate the actual throughput for a WLAN site. The 802.11b data rate is 11Mbps.

Because of the use of back-off timers and ACKs, the throughput is reduced.

Which data rate is closest to the actual throughput of this site?

A.5.5 Mbps

B.4.5 Mbps

C.7.5 Mbps

D.8.5 Mbps

Answer: A

6. What is one way of increasing an RF signal amplitude?

A.use a Wireless Security Server (WSS) to increase the RF signal

B.use a high gain antenna to focus the RF signal

C.use a device to cause diffraction of the RF signal

D.use a bridge to connect equipment

Answer: B

7. You have planned a WLAN network using the WLAN Management System (WMS). You have also calculated the coverage your antennas provide.

What else should you do to ensure adequate coverage?

A.use WMS to calculate the available bandwidth for the network

- B.install an access point at the site and check your handset connection to it
- C.measure the distance between access points to ensure adequate coverage
- D.conduct a site survey to determine actual radio wave strength at various locations at the site

Answer: D

8. Wireless networks need to provide access to multiple devices using a shared medium. Since wireless networks use the air as the medium, data collisions cannot be detected.

Which method is used in a WLAN network to prevent collisions?

- A.CPDQ
- B.CSMA/CA
- C.CSMA/CD
- D.ETSI

Answer: B

9. A 128-bit Wired Equivalent Privacy (WEP) is a shared key authentication system that means the client machine and Access Point share the same key.

Which vulnerability is inherent with this type of security scheme?

- A.The open architecture of the WEP security scheme leaves it vulnerable to hackers.
- B.Any WEP enabled device transmitting OTA unencrypted makes the WLAN vulnerable.
- C.A static WEP key can be compromised if a hacker can gather enough transmitted packet information.
- D.The WEP security model is open to impersonation type hacking, by replication of MAC addresses, usernames, and passwords.

Answer: C

10. You are preparing to deploy a WLAN, which action leaves a LAN most vulnerable to security risks?

- A.attaching the WLAN directly to the LAN
- B.using WPA as an authentication method
- C.creating a DMZ on a subnet and connecting the WLAN to it
- D.connecting a WLAN 2300 security switch directly to a DMZ

Answer: A

11. A VPN using IPSec has been chosen as a security measure in a customers WLAN deployment.

What additional security measures should you take for this deployment?

- A.allow SSID broadcasts in the network
- B.disable the encapsulating security payload (ESP) protocol on the network
- C.require the client to authenticate using the WLAN firewall or security switch to start an IPSec session
- D.ensure a secure IPSec connection, applying a different set of rules to the server so the client does not know the server settings

Answer: C

12. The WLAN 2300 series solution provides a number of security features, including the use of Temporal Key Integrity Protocol. TKIP fixes holes in the WEP security model.

Which property is an advantage when using TKIP over WEP?

- A.MAC based filtering
- B.Uses 5/9s algorithm
- C.TKIP uses a 24bit IV
- D.Message Integrity Check

Answer: D

13. WLAN 2300 release 7.0 introduces Dynamic RADIUS.

What does this feature do?

- A.It allows a RADIUS server to automatically detect and locate new devices.
- B.It allows all RADIUS servers to dynamically locate the Wireless Security Servers (WSS) in the network.
- C.It allows the WLAN Management Software (WMS) to automatically discover RADIUS servers in the network.
- D.It allows administrators supporting a RADIUS server to disconnect a user and change the authorization attributes of an existing user session.

Answer: D

14. A customer is setting up the WLAN 2300 series to provide security. They have an existing PKI

environment in place and would like to leverage the existing environment.

Which two supported authentication/encryption methods meet this requirement? (Choose two.)

A. PEAP-TLS

B. EAP-TLS

C. EAP-MD5

D. WPA-PSK

Answer: AB

15. What are two IPsec security protocols? (Choose two.)

A. IP Header

B. Authentication Header (AH)

C. Encapsulating Security Payload (ESP)

D. Point-to-Point tunneling Protocol (PPTP)

Answer: BC

Visualexams.com was founded in 2006. The safer,easier way to help you pass any IT Certification exams . We provide high quality IT Certification exams practice questions and answers(Q&A). Especially Adobe, Apple, Citrix, Comptia, EMC, HP, HuaWei, LPI, Nortel, Oracle, SUN, Vmware and so on. And help you pass any IT Certification exams at the first try.
