1. A customer has a Multimedia Communication Server (MCS) 5100 RIs. 4.0 system installed in a four-server configuration. They want to provide database backups for their Database Manager.

What is the recommended method for backing-up the database?

- A. backup to tape
- B. backup to client PC
- C. backup over the IP network
- D. backup to CD on the server CD-RW (Read-Write) drive

Answer: C

2. A customer plans to implement a Multimedia Communication Server (MCS) 5100 RIs. 4.0 system and wants to ensure that the site has the necessary equipment to interconnect to their existing IP-based enterprise network.

Which requirement must be provided before the system can be installed and connected to the enterprise network?

- A. two separate AC power sources
- B. optional Uninterruptible Power Supplies
- C. layer 1 switch with 1G Ethernet interfaces
- D. layer 2 switch with 10/100M Ethernet interfaces

Answer: D

3. A service provider wants to use a console connection to configure a four-server Multimedia Communication Server (MCS) 5100 RIs. 4.0 system from a common platform.

What hardware is required?

- A. a Layer 2 switch
- B. a Layer 3 switch
- C. a Terminal Server
- D. a System Management Console PC

Answer: D

4. A customer has deployed a Multimedia Communication Server (MCS) 5100 RIs. 4.0 system with two Database Managers to provide redundancy.

Which statement describes how redundancy is implemented for the Database Managers?

- A. The secondary Database Manager will take over if the primary does not respond to a periodic ping message.
- B. If a problem occurs with the primary Database Manager, the secondary Database Manager takes over in read-only mode.
- C. Both Database Managers are active; there is neither a primary nor a secondary Database Manager. Either Database Manager can process all data.

D. The System Manager will force a transfer to the secondary Database Manager, if the primary does not respond to a periodic ping message.

Answer: B

5. In a Multimedia Communication Server (MCS) 5100 RIs. 4.0 four-server or eight-server configuration, which two roles does the Session Manager perform? (Choose two.)

- A. It serves as a SIP Proxy Server.
- B. It collects billing data for all SIP clients.
- C. It processes SIP requests and responses.
- D. It translates Unistim transactions to the SIP.

Answer: AC
