Latest Version

We are constantly reviewing our products. New material is added and old material is revised. Free updates are available for 90 days after the purchase. You should check your member zone at VisualExams and update 3-4 days before the scheduled exam date.

Here is the procedure to get the latest version:

1. Go to <http://www.visual exams.com/>
2. Log in the **User Center**
3. The latest versions of all purchased products are downloadable from here. Just click the links.

Feedback

If you spot a possible improvement then please let us know. We always interested in improving product quality.

Feedback should be send to Visual exams@hotmail.com. You should include the following: Exam number, version, page number, question number, and your login Account.

Our experts will answer your mail promptly.

Explanations

This product does not include explanations at the moment. If you are interested in providing explanations for this exam, please contact Visual exams@hotmail.com.

Features

- Comprehensive questions with complete details
- Instant Downloadable in PDF form.
- Verified Answers Researched by Industry Experts
- Questions accompanied by exhibits.
- Drag and Drop questions as experienced in the Actual Exams.
- These questions and answers are backed by our GUARANTEE.
- Questions updated on regular basis.
- Like actual certification exams our product is in multiple-choice questions (MCQs)

Commitment to Your Success: At VisualTestExam.com, we are committed to you ongoing success. Our exams and questions are constantly being updated and compared to industry standards.

Want to earn a Microsoft certification like MCSE, MCSE 2003, CCNA, CCNP? Thinking about getting an A+ or CCSP?

A, CCSP or Network+ Certification with less effort and time. You will be astonished at the theoretical and practical knowledge you will acquire in such a short period of time using our Certification Training Products. Our Study material will enable you to pass your Microsoft, Your Cisco and any other certification on the very first attempt.

Guarantee

VisualExams provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if somehow you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

A customer's dialing requirements, listed below, require that all station users assigned an NCOS of 3 and Class of Service of Conditionally Toll Denied (CTD) be able to place toll calls from the United States to Australia.

Australia Country Code: 61

NCOS of 3 has an FRL of 3

Expensive Routers are not being used

With reference to the exhibit, which table will allow all station users to be able to place these toll calls?

- A. Provisioning Table A
- B. Provisioning Table B
- C. Provisioning Table C
- D. Provisioning Table D

Answer: B

2. Time-Division Multiplexing (TDM) uses trunks as a single or multi-channel telephone transmission channel with wide bandwidth to establish connections between switching systems and distribution points, or between two different types of switching systems.

Which type of transmission do TDM connections, or circuits, transmit, receive, or combine transmissions/receives of?

- A. SIP and H.323 Transmissions Only
- B. Both Voice and Data Transmissions

- C. Data Only Transmissions
- D. Voice Only Transmissions

Answer: B

3. Which functionality do TIE trunks provide?

- A. connects a telephone companies' central office and the PBX of a customer
- B. connects two different PBXs, whether in the same building or further away
- C. allows an outside caller to dial a station on a PBX directly
- D. provide incoming or outgoing service only, and not a combination of incoming/outgoing connections

Answer: B

4. Integrated Services Digital Network (ISDN) uses international standards defined by ITU-T, an advisory committee under the ITU, to provide recommendations for global standards. It transmits voice, data and video communications as well as telephone signaling information, using internationally approved protocols to provide faster, economical and high QoS services.

What is ISDN divided into?

- A. Central Office Trunks (COT) and Direct Inward Dial (DID) Trunks
- B. Foreign Exchange (FX) and Wide Area Telephone Service (WATS) trunks
- C. Basic Rate Interface (BRI) and Primary Rate Interface (PRI)
- D. H.323 and SIP media paths

Answer: C

5. SIP connectivity, or SIP trunking, provides a direct media path (trunk interface) between domains.

Which type of servers do SIP Servers consist of?

- A. Proxy Server, Redirect Server and Registrar Server
- B. Converged Desktop Service (CDS), Multimedia Communication Server (MCS), and Office Communications Server (OCS)
- C. SIP User Agent, SIP Signaling Gateway, and SIP Trunk Gateway
- D. Microsoft LCS 2500, Microsoft OCS 2007, and IBM Lotus Notes

Answer: A

6. In an IP Peer Networking environment on the Communication Server (CS) 1000, what functionality does the Network Routing Service (NRS) provide?

- A. replaces the basic networking parameters defined in BARS/NARS
- B. provides transcoding functionality for IP to TDM and TDM to IP calls
- C. centralized management of a single network dialing plan for SIP, H.323 and mixed SIP/H.323 networks
- D. synchronizes system configuration and database between Call Server and the Signaling Server

Answer: C

7. The Communication Server (CS) 1000 VoIP network architecture uses a Gatekeeper.

Which function does the CS 1000 Gatekeeper provide?

- A. Receives call setup requests.
- B. Converts one media stream to another, such as voice packets to analog.
- C. Functions as a server and client to make requests on behalf of other clients.
- D. Performs address translation and admission control.

Answer: D

ESN Access Codes and Basic Parameters

Input Description	Input Value
Maximum number of Digit Manipulation tables (MXDM):	1000 (0 - 1000)
Maximum number of Route Lists (MXRL):	1000 (0 - 1000)
Time of Day Schedules (TODS): (Items separated by a space)	0 00 00 23 59
Routing Controls (RTCL):	<input type="checkbox"/>
Check for Trunk Group Access Restrictions (TGAR):	<input type="checkbox"/>
NCOS Map (NMAP): (Items separated by a space)	00-0 01-0 02-0 03-0 04-0 05-0 06-0 07-0 08-0 09-0 10-0 11-0 12-0 13-0 14-0 15-0 16-0 17-0 18-0 19-0 20-0 21-0 22-0 23-0 24-0 25-0 26-0 27-0 28-0 29-0 30-0 31-0 32-0 33-0 34-0 35-0 36-0 37-0 38-0 39-0 40-0 41-0
Maximum number of Supplemental Digit restriction blocks (MXSD):	1500 (0 - 1500)
Maximum number of Incoming Trunk Group exclusion tables (MXIX):	255 (0 - 255)
Maximum number of Free Calling area screening tables (MXFC):	255 (0 - 255)
Maximum number of Free Special number screening tables (MXFS):	255 (0 - 255)
NARS/BARS Access Code 1 (AC1):	9
NARS/BARS Dial Tone after dialing AC1 or AC2 access codes (DLTN):	<input checked="" type="checkbox"/>
Expensive Route Warning Tone (ERWT):	<input checked="" type="checkbox"/>
- Expensive Route Delay Time (ERDT):	6 (0 - 10)
Extended Time of Day schedule (ETOD):	
Maximum number of LOC codes (NARS only) (MXLC):	16000 (0 - 16000)
Maximum number of Special Common Carrier entries (MSCC):	(0 - 7)
NARS Access Code 2 (AC2):	6
Coordinated Dialing Plan feature for this customer (CDP):	<input checked="" type="checkbox"/>
- Maximum number of Steering Codes (MXSC):	32000 (1 - 32000)
- Number of digits in CDP DN (DSC + DN or LSC + DN) (NCDP):	7 (3 - 10)

Before any other tables can be provisioned, which settings must have been provisioned in the ESN Data Block?

- A. Maximum parameters, including Maximum number of Digit Manipulation Tables (MXDM), Maximum number of Route Lists (MXRL), Maximum number of Supplemental Digit restriction blocks (MXSD) and Maximum number of Steering Codes (MXSC)
- B. NARS/BARS Access Code 1 (AC1) and NARS/BARS Access Code 2 (AC2)
- C. NCOS Map (NMAP)
- D. Time of Day Schedules (TODS) and Routing Controls (RTCL)

Answer: A

An employee at a company is placing a call to telephone number 214-774-3299. The employee, believing this is a toll call, dials 9-1-214-774-3299. However, this call is a local call.

Access Code 1 = 9

The Central Office utilizes a 7-digit dialing plan.

Give the DMI indexes programmed into this Communication Server 1000 shown in the exhibit, which DMI would be used to modify the dialed digits to outpulse the correct digits to the Central Office?

- A. DMI Table 1
- B. DMI Table 2
- C. DMI Table 3
- D. DMI Table 4

Answer: B

Visualexams.com was founded in 2006. The safer,easier way to help you pass any IT Certification exams . We provide high quality IT Certification exams practice questions and answers(Q&A). Especially Adobe, Apple, Citrix, Comptia, EMC, HP, HuaWei, LPI, Nortel, Oracle, SUN, Vmware and so on. And help you pass any IT Certification exams at the first try.
