Latest Version

We are constantly reviewing our products. New material is added and old material is revised. Free updates are available for 90 days after the purchase. You should check your member zone at VisualExams and update 3-4 days before the scheduled exam date.

Here is the procedure to get the latest version:

1. Go to <http://www.visual exams.com/>
2. Log in the **User Center**
3. The latest versions of all purchased products are downloadable from here. Just click the links.

Feedback

If you spot a possible improvement then please let us know. We always interested in improving product quality.

Feedback should be send to Visual exams@hotmail.com. You should include the following: Exam number, version, page number, question number, and your login Account.

Our experts will answer your mail promptly.

Explanations

This product does not include explanations at the moment. If you are interested in providing explanations for this exam, please contact Visual exams@hotmail.com.

Features

- Comprehensive questions with complete details
- Instant Downloadable in PDF form.
- Verified Answers Researched by Industry Experts
- Questions accompanied by exhibits.
- Drag and Drop questions as experienced in the Actual Exams.
- These questions and answers are backed by our GUARANTEE.
- Questions updated on regular basis.
- Like actual certification exams our product is in multiple-choice questions (MCQs)

Commitment to Your Success: At VisualTestExam.com, we are committed to you ongoing success. Our exams and questions are constantly being updated and compared to industry standards.

Want to earn a Microsoft certification like MCSE, MCSE 2003, CCNA, CCNP? Thinking about getting an A+ or CCSP?

A, CCSP or Network+ Certification with less effort and time. You will be astonished at the theoretical and practical knowledge you will acquire in such a short period of time using our Certification Training Products. Our Study material will enable you to pass your Microsoft, Your Cisco and any other certification on the very first attempt.

Guarantee

Visualexams provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if somehow you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

1. You write code that changes a value in the application scope. You are using the tag to prevent race conditions and do not want to lock the entire application scope. What should you do?

- A. Use the name attribute.
- B. Use the type attribute.
- C. Use the timeout attribute.
- D. Use the output attribute.

Answer: A

2. If you do NOT specify the mode with FileOpen(), in which mode does ColdFusion open the file?

- A. read
- B. readBinary
- C. Write
- D. append

Answer: A

3. What are the three thread scopes that each thread contains when using the tag?

- A. The Local, This, and Session scopes.
- B. The Caller, Thread, and Attributes scopes.
- C. The Application, Thread, and Caller scopes.
- D. The thread-local, Thread, and Attributes scopes.

Answer: D

4. You set up an Application.cfc file that includes the onApplicationStart() method to initialize application-level variables. Which three options trigger the onApplicationStart() method after you restart a system? (Choose three.)

- A. The first session is created in your application.
- B. The first page is requested in your application.
- C. The first request is made to a Web service or flash remoting.
- D. The first CFC is invoked within the application.
- E. The onRequest() method is called.
- F. The onSessionEnd() method is called.

Answer: BCD

5. You want to use three tags in your application to handle request, validation, and exception types of errors.

Where should you place these three tags in your application so that every page can use these tags?

- A. On the site-wide error handler in the ColdFusion Administrator.
- B. In the onRequestStart() method in the Application.cfm file in the Web root.
- C. In the Application.cfc or Application.cfm file in the Web root.

D. In the onRequest() method in the Application.cfc file.

Answer: C

6. You execute the following code:

- 1) <cfquery datasource=connRecords?name=addressList?>
- 2) SELECT *
- 3) FROM members
- 4) WHERE firstName=<cfqueryparam value=?firstName#?>
- 5) CFSQLtype= F_SQL_VARCHAR?maxlength=?0?cachedwithin=?,2,0,0?
- 6) </cfquery>

After executing the code, you receive an error. What is the problem with the code?

- A. The tag inside the WHERE statement.
- B. The = sign before the tag.
- C. The cachedwithin attribute with the tag.
- D. The CF_SQL_VARCHAR type with the tag.

Answer: C

7. You want to create a variable and ensure that a default value, if one does not exist, within a single ColdFusion template page is assigned.

Which ColdFusion tag should you use?

- A.
- B.
- C.
- D.

Answer: D

8. You have two components named cfcOne and cfcTwo. You want cfcOne to have access to the methods within cfcTwo. What should you do?

- A. Use the caller scope to reference the methods from within cfcTwo.
- B. Use the extends attribute for the tag on cfcOne.
- C. Use the extends attribute for the tag on cfcTwo.
- D. Reference the methods within cfcTwo by using cfcTwo.cfcOne

Answer: B

9. You have four methods defined in a component in your application. You want to access one of the methods through Flash Remoting. What should you do to ensure that Flash Remoting can use a method from this component?

- A. Add the access attribute with a value of remote to the tag for that method.
- B. Add an argument to the tag for the method you want to call from Flash Remoting.

- C. Use the Arguments scope when you call this function.
- D. Add an attribute of access with a value of Flash to the tag for the method you want to call from Flash Remoting.

Answer: A

10. You use a ColdFusion Component (CFC) in your application. You want the access to be restricted to only functions in the component and its extending components.

What access should you define?

- A. Public
- B. Package
- C. Private
- D. Remote

Answer: C

11. What is the difference between the CreateObject() function and the tag when used to instantiate a CFC?

- A. The tag allows you to place the CFC into a shared scope.
- B. The CreateObject() function can be used inside a tag.
- C. The THIS scope is available only when you instantiate a CFC by using the tag.
- D. The CreateObject() function creates a structure variable.

Answer: B

12. You want to invoke an instance-based component with a single line of code. The code must instantiate and execute the method. What should you use?

- A. Use the tag
- B. Use the tag .
- C. Use the IsObject() function.
- D. Use the CreateObject() function.

Answer: D

13. You want to keep track of the number of visitors on your Web site at any given time. Which variable scope allows you to do this?

- A. The session scope.
- B. The request scope.
- C. The application scope.
- D. The cookie scope.

Answer: C

14. Which ColdFusion built-in function can invoke a component method in the same line of code that instantiates the component?

- A. Int()

- B. CreateUUID()
- C. CreateObject()
- D. IsInstanceOf()

Answer: C

15. You want to greet a user with their first and last name after a user logs on to your Web site. You want to use this user personalization as long as a user is logged on your Web site. Which scope should you use for the first and last name variables?

- A. The local scope.
- B. The request scope.
- C. The session scope.
- D. The application scope.

Answer: C

16. You have a variable named myVar that you have declared on a page named firstPage.cfm. You use to include this page in another page called callPage.cfm. Which scope should you use to reference myVar from callPage.cfm?

- A. The Variables scope.
- B. The request scope.
- C. The session scope.
- D. The cookie scope.

Answer: A

17. You are using four scopes within a pageURL, Variables, Form, and CGI. Which of these four scopes is checked first by ColdFusion?

- A. URL
- B. Variables
- C. Form
- D. CGI

Answer: B

18. You are using a file structure as shown in the Exhibit.

You do NOT have any Application.cfc or Application.cfm files in your application. To which folder in the file structure will ColdFusion search for an Application.cfc or Application.cfm when a file is called that is located in the oneInch folder?

- A. The ACF-DB folder.
- B. The oneInch folder.
- C. The root of the hard drive.
- D. The screws folder.

Answer: C

19. You want to use session variables in an application. You have a single Application.cfm file that you use in the application. You have enabled session management in the ColdFusion Administrator. What should you do to enable session variables within your application?

- A. Use the tag with sessionManagement=true.
- B. Use the tag with the This scope.
- C. Use the tag with the Session scope.
- D. Use the tag in the onApplicationStart() method.

Answer: A

20. What type of session ID is assigned to the session variables

- A. CFID and CFTOKEN only.
- B. CFID and CFTOKEN, or JSESSIONID.
- C. JSESSIONID and CFTOKEN only.
- D. CFID and JSESSION ID only.

Answer: B

Visualexams.com was founded in 2006. The safer,easier way to help you pass any IT Certification exams . We provide high quality IT Certification exams practice questions and answers(Q&A). Especially Adobe, Apple, Citrix, Comptia, EMC, HP, HuaWei, LPI, Nortel, Oracle, SUN, Vmware and so on. And help you pass any IT Certification exams at the first try.
