

**Exam : EMC E20-501**

**Title : Commercial Storage & Info  
Infrastructure Exam for  
Tech Archs**

**Version : Demo**

## Important Note, Please Read Carefully

### Other VisualExams products

[All visualexams IT Exam Products](#)

### Our products of Offline Testing Engine

Use the offline Testing engine product to practice the questions in an exam environment.

Build a foundation of knowledge which will be useful also after passing the exam.

### Latest Version

We are constantly reviewing our products. New material is added and old material is revised. Free updates are available for 90 days after the purchase. You should check your member zone at VisualExams and update 3-4 days before the scheduled exam date.

Here is the procedure to get the latest version:

1. Go to <http://www.visualexams.com/>
2. Log in the **User Center**
3. The latest versions of all purchased products are downloadable from here. Just click the links.

### Feedback

If you spot a possible improvement then please let us know. We always interested in improving product quality.

Feedback should be send to [Visualexams@hotmail.com](mailto:Visualexams@hotmail.com). You should include the following: Exam number, version, page number, question number, and your login Account.

Our experts will answer your mail promptly.

### Explanations

This product does not include explanations at the moment. If you are interested in providing explanations for this exam, please contact [Visualexams@hotmail.com](mailto:Visualexams@hotmail.com).

### Features

- Comprehensive questions with complete details
- Instant Downloadable in PDF form.
- Verified Answers Researched by Industry Experts
- Questions accompanied by exhibits.
- Drag and Drop questions as experienced in the Actual Exams.
- These questions and answers are backed by our GUARANTEE.
- Questions updated on regular basis.
- Like actual certification exams our product is in multiple-choice questions (MCQs)

**Commitment to Your Success: At VisualTestExam.com, we are committed to your ongoing success. Our exams and questions are constantly being updated and compared to industry standards.**

Want to earn a Microsoft certification like [MCSE](#), [MCSE 2003](#), [CCNA](#), [CCNP](#)? Thinking about getting an [A+](#) or [CCSP](#)?

A, [CCSP](#) or [Network+](#) Certification with less effort and time. You will be astonished at the theoretical and practical knowledge you will acquire in such a short period of time using our Certification Training Products. Our Study material will enable you to pass your [Microsoft](#), Your [Cisco](#) and any other certification on the very first attempt.

## **Guarantee**

VisualExams provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if somehow you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

1. Which EMC backup and recovery solution features out-of-the box integration with Microsoft Volume Shadow Copy Service (VSS)?

- A. Avamar
- B. DiskXtender
- C. NetWorker
- D. RepliStor

**Answer: D**

2. Which EMC backup and recovery solution replicates individual open and closed files, directories, and shares?

- A. Avamar
- B. DiskXtender
- C. EMC Legato
- D. RepliStor

**Answer: D**

3. Which RecoverPoint feature provides local synchronous replication between LUNs that reside in one or more arrays at the same site?

- A. CDP
- B. CRR
- C. RPA
- D. RPSD

**Answer: A**

4. Which protocol is used to connect the RecoverPoint Appliance and the storage array?

- A. FCOE
- B. Fibre
- C. IP
- D. iSCSI

**Answer: B**

5. Which Replication Manager user role has the rights to restore replicas?

- A. Database Administrator
- B. Operator
- C. Power Administrator
- D. Power User

**Answer: A**

6. How does SAN Copy, running on a CLARiiON system, identify other storage systems?

- A. Domain ID
- B. FCID
- C. MAC address
- D. World Wide Names

**Answer: D**

7. You have a customer with a remote facility containing only three Windows servers. They recently had their backup tapes fail, and they would like to implement a solution that removes tape from the remote facility, minimizes bandwidth utilization, and keeps the data secure when traveling across the network. If possible, they would like to use existing Windows servers in their data center to replicate the data to.

Which solution meets these requirements?

- A. AutoStart
- B. Avamar
- C. Disk Library
- D. RepliStor

**Answer: D**

8. A customer needs a disaster recovery solution for their Exchange environment. They currently have one site running Exchange within a SAN using CX3-80 storage, and the other smaller Exchange site using DAS. They want to implement a remote recovery solution for Exchange.

What solution will you recommend?

- A. Replication Manager
- B. RepliStor
- C. SAN Copy
- D. SnapView

**Answer: B**

9. A customer wants to have automated failover during a Windows server outage, so that if the customer experiences a server outage, the recovery process will begin without human intervention.

Which EMC solution meets the customer requirement?

- A. Celerra Replicator
- B. NetWorker
- C. RecoverPoint
- D. RepliStor

**Answer: D**

10. Your customer is currently using RepliStor at their main data center. They would also like to use it to copy data from their remote offices to the main data center. Their main concern is data security when copying from the remote offices.

What are the security features of RepliStor that would meet the customer's data security need?

- A. Connection, Digital Signature, Encryption
- B. Digital Signature, Encryption, Data Verification
- C. Encryption, Compression, Redundancy
- D. Encryption, PKI, Masking

**Answer: A**

11. A customer backs up their Windows servers to tape. They would like to complement these backups with the ability to provide disaster recovery protection in between backups, allowing only minutes of data loss as well as the ability to recover within minutes or hours.

Which solution fits this requirement?

- A. Avamar

- B. Backup Advisor
- C. Replication Manager
- D. RepliStor

**Answer: D**

12. A corporation recently acquired a secondary data center that is approximately 1,600 km from their primary data center location. The storage environment at the primary site consists of the following:

- Windows and UNIX servers
- CLARiiON storage system
- 10 TB of data to be replicated
- T3 data link and 15-minute RPO

You are proposing a CLARiiON storage system for the secondary data center. Which EMC replication solution should you propose?

- A. MirrorView/A
- B. MirrorView/S
- C. RecoverPoint CRR
- D. RecoverPoint/SE

**Answer: C**

13. XYZ Corporation has recently acquired a secondary data center that is approximately 800 km from its primary data center location. The storage environment at the primary site consists of the following:

- Windows servers only
- CLARiiON storage system
- 3 TB of data to be replicated

XYZ will purchase a CLARiiON system for the secondary data center, and they are looking for a scalable and cost-effective replication solution. Which EMC replication solution should you propose in this case?

- A. MirrorView/A
- B. MirrorView/S
- C. RecoverPoint CRR
- D. RecoverPoint/SE

**Answer: D**

14. Your customer has been using a CLARiiON CX4 array for several months and has asked you to help them design a data replication solution to their offsite facility approximately 250 km away. Their current network infrastructure can only provide them the equivalent of a T1 connection to the second facility, and they are asking for an RPO of no more than 20 minutes. They need to replicate roughly 1.75 TB of data with a change rate of less than 10%.

The solution must interoperate with Windows and Linux hosts, and maximize the limited bandwidth available to the customer today.

What replication solution would you suggest?

- A. MirrorView/A
- B. RecoverPoint CDP
- C. RecoverPoint/SE CRR
- D. SAN Copy

**Answer: C**

15. A customer has an existing production CX3-80 at their primary site and a CX3-20 at a remote site 2,000 km away. They have three dedicated DS3 and four T1 connections. They need to replicate their critical databases from the primary site to the remote site. The total size of the databases is over 5 TB. They are interested in a SAN-based method to move that much data. Their requirement is a RPO of seconds to minutes.

They are currently negotiating a new WAN contract and are looking to reduce WAN bandwidth requirements. Which EMC solution do you recommend?

- A. RecoverPoint CRR
- B. RecoverPoint/SE
- C. RepliStor
- D. SAN Copy

**Answer: A**

16. Your customer has a mission-critical Oracle database on open systems and CLARiiON that needs an

improved method of local replication. The customer wants to reduce as much as possible the amount of time between the each local replica, but is concerned about the disk space needed to maintain all the replicas. They estimate that they want to support about a week of replicas, but worry about the management needed to determine the correct replica to mount.

Which product provides the simplest way to meet this requirement?

- A. RecoverPoint CDP
- B. RepliStor
- C. SAN Copy
- D. SnapView

**Answer: A**

17. Your customer has been using a CLARiiON CX4 array for several months in their Windows environment and has asked you to help them design a data replication solution to their offsite facility approximately 250 km away. Their current network infrastructure can only provide them the equivalent of a T1 connection to the second facility, and they are asking for an RPO of no more than 20 minutes. They need to replicate roughly 1.75 TB of data with a change rate of less than 10%.

The solution must scale easily and quickly to accommodate anticipated future growth, but provide them the lowest possible entry point to meet the current requirements.

Which replication solution would you suggest?

- A. MirrorView/A
- B. RecoverPoint CRR
- C. RecoverPoint/SE CRR
- D. SAN Copy

**Answer: C**

18. A customer has a production Microsoft SQL 2005 database server in an active-passive cluster attached to a CX3-20c with SnapView. They will be implementing a data warehouse on another SQL 2005 database server in a separate active-passive cluster also attached to the same CX3-20c for reporting and analytics.

Which product will automate the process of creating and promoting application consistent database replicas from the production server to the data warehouse server?

- A. MirrorView/A
- B. Navisphere
- C. Replication Manager
- D. VDI

**Answer: C**

19. A customer wants to automate the setup and management of multiple replicas of the production database on the DMX-3 so developers can create and delete at will for aggressive application development lifecycles.

Which solution would you recommend?

- A. RecoverPoint CRR
- B. Replication Manager
- C. RepliStor
- D. SAN Copy

**Answer: B**

20. How would you describe Replication Manager's chief customer benefit?

- A. Allow the ability to have AS400 and mainframe hosts share the same BCV disk pool.
- B. Automate the creation and management of replicas.
- C. Enable consistent splits between multiple DMX-3 arrays.
- D. Provide a simple GUI that allows backup applications to restore to disk.

**Answer: B**

Visualexams.com was founded in 2006. The safer,easier way to help you pass any IT Certification exams . We provide high quality IT Certification exams practice questions and answers(Q&A). Especially Adobe, Apple, Citrix, Comptia, EMC, HP, HuaWei, LPI, Nortel, Oracle, SUN, Vmware and so on. And help you pass any IT Certification exams at the first try.
