Latest Version

We are constantly reviewing our products. New material is added and old material is revised. Free updates are available for 90 days after the purchase. You should check your member zone at VisualExams and update 3-4 days before the scheduled exam date.

Here is the procedure to get the latest version:

1. Go to <http://www.visual exams.com/>
2. Log in the **User Center**
3. The latest versions of all purchased products are downloadable from here. Just click the links.

Feedback

If you spot a possible improvement then please let us know. We always interested in improving product quality.

Feedback should be send to Visual exams@hotmail.com. You should include the following: Exam number, version, page number, question number, and your login Account.

Our experts will answer your mail promptly.

Explanations

This product does not include explanations at the moment. If you are interested in providing explanations for this exam, please contact Visual exams@hotmail.com.

Features

- Comprehensive questions with complete details
- Instant Downloadable in PDF form.
- Verified Answers Researched by Industry Experts
- Questions accompanied by exhibits.
- Drag and Drop questions as experienced in the Actual Exams.
- These questions and answers are backed by our GUARANTEE.
- Questions updated on regular basis.
- Like actual certification exams our product is in multiple-choice questions (MCQs)

Commitment to Your Success: At VisualTestExam.com, we are committed to you ongoing success. Our exams and questions are constantly being updated and compared to industry standards.

Want to earn a Microsoft certification like MCSE, MCSE 2003, CCNA, CCNP? Thinking about getting an A+ or CCSP?

A, CCSP or Network+ Certification with less effort and time. You will be astonished at the theoretical and practical knowledge you will acquire in such a short period of time using our Certification Training Products. Our Study material will enable you to pass your Microsoft, Your Cisco and any other certification on the very first attempt.

Guarantee

Visualexams provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if somehow you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

1.Which are the advantage of the hierarchical network design model? ()

- A.Easy to extend
- B.Easy for diagnosis and troubleshooting
- C.Easy for management
- D.Cost saving

Answer: abcd

2.A topology has to be chosen for a LAN or a WAN. Which topology has the smallest delay, the highest reliability but the most complicate management? ()

- A.Star
- B.Tree
- C.Ring
- D.Mesh

Answer: d

3.Which of the following is the network operation system that Huawei has intellectual proprietary and it supports multiple equipments of Huawei? ()

- A.IOS
- B.DOS
- C.VRP
- D.Quidway

Answer: c

4.All work stations can make full use of the bandwidth in the CSMA/CD network. ()

- T.True
- F.False

Answer: f

5.Which of the following support data forwarding and path selection? ()

- A.S3026E

B.S3526E

C.Routers

D.Hubs

Answer: bc

6.A frame relay network can be full-meshed. If there are 6 routers connected to the frame relay network, the required number of PVCs will be ().

A.6

B.5

C.15

D.30

Answer: c

7.POS is a technology to bear IP and other packets over the SONET/SDH.Which layer is POS defined in the OSI model? ()

A.Data link layer

B.Physical layer

C.Network layer

D.Transport layer

E.Application layer

Answer: a

8.To transmit IP voice, compression algorithm is adopted, such as the frequently used G.729. After compressed, what is the bandwidth seized by a channel of voice? ()

A.75Kbps

B.12Kbps

C.64Kbps

D.8Kbps

Answer: b

9. Which of the following can be aggregated into one Route entry 10.0.24.0/21? ()

- A. 10.0.25.0/24
- B. 10.0.23.0/24
- C. 10.0.26.0/24
- D. 10.0.22.0/24

Answer: ac

10. The DR in the OSPF is to reduce the amount of broadcast and to decrease the Link State Database synchronization times between routers in the NBMA network. However, it is meaningless when there are less than 3 routers in the network. So it is unnecessary to elect the DR when there are only 2 routers in the broadcast and Ethernet network. ()

T. True

F. False

Answer: f

11. To guarantee that backup is enabled while the network storm is prevented when designing LAN, the SPANNING TREE technology or TRUNK port aggregation technology can be adopted. ()

T. True

F. False

Answer: t

12. Which of the following descriptions of the security of the leased line access method are true? ()

A. As a traditional access mode, the leased line transmits data in the transparent channel mode in the physical layer. The semi-permanent connection is performed between two points by the line providers, so the line is of high security.

B. The secure access control and the authentication interworking are considered for this access method.

C. Encryption can be adopted in the leased line for a higher security

D. All the above descriptions are false

Answer: abc

13. Which of the following descriptions of the PQ queue strategy are true? ()

- A. PQ can provide different priorities to different service data packets, and can provide absolute priority to the high priority packet.
- B. PQ is used to guarantee the delay of the real-time application sensitive to the time like VOIP.
- C. As CQ, PQ needs to be configured, but its processing speed is faster.
- D. Because PQ cannot restrict the bandwidth of the high priority packet, the low priority packet may get no bandwidth.

Answer: abd

14. Which of the following items should be considered when making network plan? ()

- A. Equipment purchase
- B. Analysis of the physical locations and the requirements of the customers
- C. IP address planning
- D. Network equipment deployment
- E. Network topology designing

Answer: bce

15. Which of the following are needed to construct an Enterprise network? ()

- A. Operation system
- B. PCs
- C. Routers
- D. Ethernet switch

Answer: abcd

16. The life cycle of a network does not include the maintenance phase. ()

- T. True
- F. False

Answer: f

17. Users vary in requirements for the network. Which of the following should not be included at the stage of

requirement analysis? ()

- A. Understand the amount of the investment made by the user
- B. Have a clear idea of the current situation of the running network
- C. Understand what should be solved in the network
- D. Determine the network topology

Answer: d

18. The first step for network analysis is to collect the requirement of the user, which of the following are right about the requirement source? ()

- A. The requirement source may be affected by the policy of country or industry.
- B. The idea of the decision maker has a great impact over the requirement.
- C. History data
- D. Communication with the technician from the side of user will help you get the information.

Answer: abcd

19. Which of the following will affect the scalability of the network? ()

- A. Personnel changes
- B. Requirement for remote office
- C. Requirement for mobile office
- D. Service changes

Answer: abcd

20. The network designer communicates with the user to get the requirement for the network. What should be paid attention at this stage? ()

- A. Understand the organization hierarchy of the user and find the appropriate person to consult.
- B. Differentiate what requirement are to be fulfilled in practice by the user, what to be fulfilled in the design
- C. List the requirement for the network performance
- D. Obtain the investment details

Answer: abcd

Visualexams.com was founded in 2006. The safer,easier way to help you pass any IT Certification exams . We provide high quality IT Certification exams practice questions and answers(Q&A). Especially Adobe, Apple, Citrix, Comptia, EMC, HP, HuaWei, LPI, Nortel, Oracle, SUN, Vmware and so on. And help you pass any IT Certification exams at the first try.
