Latest Version

We are constantly reviewing our products. New material is added and old material is revised. Free updates are available for 90 days after the purchase. You should check your member zone at VisualExams and update 3-4 days before the scheduled exam date.

Here is the procedure to get the latest version:

1. Go to <http://www.visualexams.com/>
2. Log in the **User Center**
3. The latest versions of all purchased products are downloadable from here. Just click the links.

Feedback

If you spot a possible improvement then please let us know. We always interested in improving product quality.

Feedback should be send to Visualexams@hotmail.com. You should include the following: Exam number, version, page number, question number, and your login Account.

Our experts will answer your mail promptly.

Explanations

This product does not include explanations at the moment. If you are interested in providing explanations for this exam, please contact Visualexams@hotmail.com.

Features

- Comprehensive questions with complete details
- Instant Downloadable in PDF form.
- Verified Answers Researched by Industry Experts
- Questions accompanied by exhibits.
- Drag and Drop questions as experienced in the Actual Exams.
- These questions and answers are backed by our GUARANTEE.
- Questions updated on regular basis.
- Like actual certification exams our product is in multiple-choice questions (MCQs)

Commitment to Your Success: At VisualTestExam.com, we are committed to you ongoing success. Our exams and questions are constantly being updated and compared to industry standards.

Want to earn a Microsoft certification like MCSE, MCSE 2003, CCNA, CCNP? Thinking about getting an A+ or CCSP?

A, CCSP or Network+ Certification with less effort and time. You will be astonished at the theoretical and practical knowledge you will acquire in such a short period of time using our Certification Training Products. Our Study material will enable you to pass your Microsoft, Your Cisco and any other certification on the very first attempt.

Guarantee

Visualexams provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if somehow you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

1. Which two can be failed over during a Continuous Access EVA planned or unplanned event? (Select two.)

- A. copy set
- B. DR group
- C. managed set
- D. a single HSV controller

Answer: BC

2. Which events can you see in the Replication Solutions Manager?

- A. only events that are related to DR groups
- B. only the Continuous Access specific events
- C. only events that are related to managed sets
- D. all EVA events for the subsystems that are part of the Continuous Access environment

Answer: D

3. Which replication method provides highest redundancy within Business Copy?

- A. snapclone from a parent disk group
- B. snapclone from a non parent disk group
- C. fully allocated snapshot from a parent disk group
- D. demand allocated snap from a non parent disk group

Answer: B

4. One of two intersite links fails on a Continuous Access EVA high availability configuration. Which two statements are true? (Select two.)

- A. I/O operations transfer from one fabric to the other.
- B. If failsafe is enabled, then host I/O operations will stop.
- C. Replication Solutions Manager will report a broken connection.
- D. All DR groups on the affected path will fail over to other controllers.

Answer: AC

5. Which two statements about managed sets are true? (Select two.)

- A. DR groups may belong to only one managed set.
- B. Managed sets can be created from Command View.
- C. Managed sets can be created from Replication Solutions Manager.
- D. Managed sets may include DR groups from multiple storage systems.
- E. Managed sets may include DR groups only from a single storage system.

Answer: CD

6. Why must dynamic load-balancing be turned off for all hosts in a Continuous Access EVA configuration?

- A. to ensure that write order of all host I/Os is maintained
- B. to ensure that you do not exceed hosts I/O queue depth
- C. to ensure that hop count does not exceed maximum of two
- D. to ensure that hosts do not use different load-balancing policies

Answer: A

7. What happens by default when a copy set is deleted?

- A. The source and destination Vdisks are destroyed.
- B. The source and destination Vdisks are preserved.
- C. Only the source Vdisk is preserved; the destination Vdisk is destroyed.
- D. Only the destination Vdisk is preserved; the source Vdisk is destroyed.

Answer: B

8. On a Continuous Access EVA, how can you clear the failsafe-locked condition? (Select two.)

- A. restore the ISLs
- B. delete the DR group
- C. disable failsafe mode
- D. resume the DR group
- E. change failsafe property in copy set

Answer: AC

9. Which two statements about Business Copy (BC) are true? (Select two.)

- A. BC is limited to 16 EVA storage systems.
- B. BC host are automatically discovered by RSM.
- C. BC supports an unlimited number of EVA storage systems.
- D. BC requires a storage system to hold a raw capacity based license.
- E. BC supports an unlimited number of servers running the RSM host agent.

Answer: AE

10. Which two inputs does the Continuous Access EVA Replication Performance Estimator require? (Select two.)

- A. throughput per second
- B. two-way intersite latency
- C. one-way intersite latency
- D. size of a read data packet
- E. number of I/O's per second
- F. size of the write data packet

Answer: CF

11. What are three characteristics of the suspend command? (Select three.)

- A. initiates logging
- B. cannot be used in failsafe mode
- C. is issued on the source system only
- D. stops host I/O to source and destination Vdisks
- E. is issued either on the source or destination system

Answer: ABC

12. What is the recommended number and placement of a Management Server in a Continuous Access EVA configuration? (Select two.)

- A. one at the source site
- B. two at the source site

- C. one at the destination site
- D. two on the destination site

Answer: BD

13. Replication Solutions Manager receives events applicable to user activities directly from _____.

- A. HSV controllers
- B. Command View EVA
- C. Systems Insight Manager
- D. Storage Management Server Notification Utility

Answer: A

14. You are configuring a high-availability Continuous Access EVA solution using an EVA 8000 storage system. How should each port of the controllers be connected?

- A. There are no specific cabling configuration requirements in Continuous Access EVA configurations.
- B. Port 1 and 2 on the top controller should be connected to the same fabric as Port 1 and 2 on the lower controller.
- C. Port 1 and 3 on the top controller should be connected to the same fabric as Port 1 and 3 on the lower controller.
- D. Port 2 and 4 on the top controller should be connected to a different fabric than Port 2 and 4 on the lower controller.
- E. Port 3 and 4 on the top controller should be connected to the same fabric as Port 3 and 4 on the lower controller.

Answer: C

15. For the Continuous Access EVA, which two statements are true for DR group normal mode? (Select two.)

- A. It assures best performance.
- B. It ensures the highest data integrity.
- C. It is the default mode for a DR group.
- D. It stops I/O if the destination is unavailable.

E. It is also referred to as failsafe-disabled mode.

Answer: CE

Visualexams.com was founded in 2006. The safer,easier way to help you pass any IT Certification exams . We provide high quality IT Certification exams practice questions and answers(Q&A). Especially Adobe, Apple, Citrix, Comptia, EMC, HP, HuaWei, LPI, Nortel, Oracle, SUN, Vmware and so on. And help you pass any IT Certification exams at the first try.
