### Latest Version

We are constantly reviewing our products. New material is added and old material is revised. Free updates are available for 90 days after the purchase. You should check your member zone at VisualExams and update 3-4 days before the scheduled exam date.

Here is the procedure to get the latest version:

1. Go to <http://www.visual exams.com/>
2. Log in the **User Center**
3. The latest versions of all purchased products are downloadable from here. Just click the links.

### Feedback

If you spot a possible improvement then please let us know. We always interested in improving product quality.

Feedback should be send to [Visual exams@hotmail.com](mailto:Visual exams@hotmail.com). You should include the following: Exam number, version, page number, question number, and your login Account.

Our experts will answer your mail promptly.

### Explanations

This product does not include explanations at the moment. If you are interested in providing explanations for this exam, please contact [Visual exams@hotmail.com](mailto:Visual exams@hotmail.com).

### Features

- Comprehensive questions with complete details
- Instant Downloadable in PDF form.
- Verified Answers Researched by Industry Experts
- Questions accompanied by exhibits.
- Drag and Drop questions as experienced in the Actual Exams.
- These questions and answers are backed by our GUARANTEE.
- Questions updated on regular basis.
- Like actual certification exams our product is in multiple-choice questions (MCQs)

**Commitment to Your Success: At VisualTestExam.com, we are committed to you ongoing success. Our exams and questions are constantly being updated and compared to industry standards.**

Want to earn a Microsoft certification like MCSE, MCSE 2003, CCNA, CCNP? Thinking about getting an A+ or CCSP?

A, CCSP or Network+ Certification with less effort and time. You will be astonished at the theoretical and practical knowledge you will acquire in such a short period of time using our Certification Training Products. Our Study material will enable you to pass your Microsoft, Your Cisco and any other certification on the very first attempt.

## **Guarantee**

Visualexams provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if somehow you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

1. What are the steps to manage distributed data collection files so you can view a single report from the management station?
- A. copy the raw files to the management station, export them to the data warehouse using ovcoltosql
  - B. export the data to the data warehouse on the collection station using ovcoltosql, replicate to the management station
  - C. from the management station, run ovdwtrend -export pointing to the files on the collection station
  - D. run ovdwtrend -export on the collection station pointing to the data warehouse on the management station

**Answer: A**

2. By default, how does data get from Problem Diagnosis probes to the server?
- A. they maintain a TCP connection with a heartbeat
  - B. through an HTTP upload
  - C. the probe stores data until the server sends a request
  - D. the probe packs the data in an OV event

**Answer: B**

3. You want to do trend analysis in your distributed management environment and always be able to see the most recent six months of data from your management station. What is the architecture of your data collection?
- A. Configure each collection station to monitor the data, store the data, and send reports to the management station?
  - B. Configure each collection station to monitor the data, upload the data to the management station, and create reports at the management station.
  - C. Configure collection at the collection station and have NNM automatically synchronize data back to the management station for reporting.
  - D. Configure collection at the management station and it automatically partitions collection and assigns it to the nearest collection station.

**Answer: B**

4. Your management station manages a domain of its own in addition to receiving information from a remote collection station. You just got a large bill from your WAN provider for last month when your remote collection station went down. How can you avoid that in the future? Select TWO.
- A. Configure overlapping domains so the management station will not have to resynchronize everything.
  - B. Configure a failover filter to minimize management station polling.
  - C. Add a backup collection station at the remote location to manage the remote domain redundantly.
  - D. Configure the -nosynchronize option to allow natural updating of the management station when a collection station returns to normal operation.

**Answer: BC**

5. To improve bandwidth utilization in DIM, you could \_\_\_\_\_.

- A. force a complete synchronization every morning using nmdemandpoll so data is more accurate for the rest of the day
- B. stop and restart the collection station on a regular schedule to re-establish a clean link
- C. avoid restarting the management station
- D. configure ovtopmd.lrf with the -minTopo parameter so less data is uploaded

**Answer: C**

6. How long does a management station take to recognize that a collection station is down and to initiate failover polling?

- A. 5 minutes
- B. 20 minutes
- C. 4 polling cycles
- D. One failed poll

**Answer: C**

7. To enable a Problem Diagnosis probe to report to multiple servers, you can \_\_\_\_\_.

- A. configure the probe in the configuration file of each server
- B. configure the probe to monitor the path to each server
- C. initiate a trek using the probe to add it to servers automatically
- D. configure all the server names in the probe configuration file

**Answer: A**

8. What must be true for a management station to implement failover of a collection station?

- A. The collection station must have a failover filter in place.
- B. The management station must have access to the monitored objects.
- C. At least two collection stations must have been reporting on the objects.
- D. The management station must have its overlap mode set to DeleteSecondary.

**Answer: B**

9. Which event should you configure to be forwarded from a collection station to a management station?

- A. threshold events from data collection
- B. node status events from netmon
- C. connectorDown events created by ECS
- D. node added and deleted events from netmon

**Answer: A**

10. During normal processing, you have automatic failover configured on a management station for a collection station. Which overlap mode is most efficient?

- A. AllowOverlap keeps active copies of all objects at the management station so failover takes the least processing.
- B. UnmanageSecondary holds a space for each object so failover takes less time.
- C. DeleteSecondary frees the most space and processing time on the management station, and failover handles the rare occurrence where the collection station goes down.
- D. NoOverlap allows the management station to discontinue monitoring the objects.

**Answer: C**

11. How do you unlink a Problem Diagnosis server from a remote probe?

- A. From Problem Diagnosis view, select the probe from the list and [Delete].
- B. Edit pdconfig.xml and remove the <Probe> block.
- C. Execute pdconfig.ovpl -unlink on the server.
- D. Edit nprobe.conf and remove the server name.

**Answer: B**

12. Which function does a topology filter perform?

- A. It directly eliminates topology objects from a map.
- B. It prevents topology objects from being locally discovered.
- C. It affects the topology view exported by a collection station.
- D. It dictates a particular topology object be resident on a particular map.

**Answer: C**

13. The difference between an NNM Advanced Edition collection station and an NNM Advanced Edition management station is that on the collection station \_\_\_\_\_.

- A. only the collecting software is installed
- B. only the collecting processes are running
- C. the replication process is running
- D. the replication process is not running

**Answer: D**

14. You have configured a topology filter on a collection station so only connector devices are uploaded to the management station. You have also configured threshold events to be forwarded to the management station. When a server violates a threshold, what appears in the Alarm Browser on the management station?

- A. the server threshold alarm from the collection station
- B. no alarm appears
- C. a warning from the collection station that a threshold has been violated on an un-replicated node
- D. the server threshold alarm generated by the management station

**Answer: A**

15. What are the best items to place in a failover filter? Select TWO.

- A. critical servers
- B. desktop workstations
- C. remote collection stations
- D. local collection stations
- E. connector devices
- F. DHCP devices

**Answer: AE**

Visualexams.com was founded in 2006. The safer,easier way to help you pass any IT Certification exams . We provide high quality IT Certification exams practice questions and answers(Q&A). Especially Adobe, Apple, Citrix, Comptia, EMC, HP, HuaWei, LPI, Nortel, Oracle, SUN, Vmware and so on. And help you pass any IT Certification exams at the first try.
