Latest Version

We are constantly reviewing our products. New material is added and old material is revised. Free updates are available for 90 days after the purchase. You should check your member zone at VisualExams and update 3-4 days before the scheduled exam date.

Here is the procedure to get the latest version:

1. Go to <http://www.visualexams.com/>
2. Log in the **User Center**
3. The latest versions of all purchased products are downloadable from here. Just click the links.

Feedback

If you spot a possible improvement then please let us know. We always interested in improving product quality.

Feedback should be send to Visualexams@hotmail.com. You should include the following: Exam number, version, page number, question number, and your login Account.

Our experts will answer your mail promptly.

Explanations

This product does not include explanations at the moment. If you are interested in providing explanations for this exam, please contact Visualexams@hotmail.com.

Features

- Comprehensive questions with complete details
- Instant Downloadable in PDF form.
- Verified Answers Researched by Industry Experts
- Questions accompanied by exhibits.
- Drag and Drop questions as experienced in the Actual Exams.
- These questions and answers are backed by our GUARANTEE.
- Questions updated on regular basis.
- Like actual certification exams our product is in multiple-choice questions (MCQs)

Commitment to Your Success: At VisualTestExam.com, we are committed to you ongoing success. Our exams and questions are constantly being updated and compared to industry standards.

Want to earn a Microsoft certification like MCSE, MCSE 2003, CCNA, CCNP? Thinking about getting an A+ or CCSP?

A, CCSP or Network+ Certification with less effort and time. You will be astonished at the theoretical and practical knowledge you will acquire in such a short period of time using our Certification Training Products. Our Study material will enable you to pass your Microsoft, Your Cisco and any other certification on the very first attempt.

Guarantee

Visualexams provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if somehow you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

1.Which statement describes the functionality of an AAM Sensor?

- A.A Sensor returns the value of the data point to a trigger.
- B.A Sensor fires an associated rule when the value of the data point changes.
- C.A Sensor fires an associated trigger when the value of the data point changes.
- D.A Sensor senses changes in the value of a data point and submits those changes to its associated rule.

Answer: A

2.When is it appropriate to configure node-specific isolation detection IP addresses instead of domain-specific isolation detection IP addresses?

- A.when isolation detection IP addresses are common to all nodes
- B.when a configuration has only one isolation detection IP address
- C.when isolation detection IP addresses are not common to all nodes
- D.when a configuration has five or more isolation detection IP addresses

Answer: C

3.Which statement is true when creating a new service resource?

- A.The default response test is used to query the service status.
- B.AAM discovers all services on all nodes when selecting the service to run.
- C.AAM prevents the target node list from containing nodes on which the service is not installed.
- D.The account information set must match the account for the service configuration in the service Control Manager applet.

Answer: B

4.What are three elements of a Resource Group? (Choose three.)

- A.rules
- B.delays
- C.sensors
- D.node proxies
- E.Utility Processes
- F.event messages

Answer: BEF

5.A three-node domain is configured with each of the nodes connected to two networks. A network cable attached to node A's Network Interface Card (NIC) is accidentally detached. Later that evening, the maintenance crew unplugs power to the hub on node A's remaining working network.

Which statement is true?

- A.The node is considered isolated.
- B.Nodes B and C will report node A as shut down.
- C.The resources running on node A are taken offline.

D. When the network connection is re-established, node A will determine that its Resource Group objects have changed to a failed state.

Answer: A

6. Which is a valid IP address for private non-routed network use?

- A. 37.16.256.4
- B. 117.24.103.40
- C. 127.0.0.1
- D. 192.168.7.69

Answer: D

7. Which two networking statements are correct? (Choose two.)

- A. Routing is the same on all operating systems.
- B. Routing is the same on UNIX operating systems.
- C. Not all switches will route multicast traffic by default.
- D. To observe the routing table on a UNIX or Windows server, you should use the netstat -nr command.

Answer: CD

8. Which three options should you consider when performing a failover in a WAN environment? (Choose three.)

- A. isolation detection
- B. transfer of host name
- C. location of DNS servers
- D. transfer of IP addresses
- E. secondary agents on both sides of the network

Answer: ACD

9. Which two are clustering topologies? (Choose two.)

- A. ring
- B. star
- C. one to one
- D. one to none
- E. many to one

Answer: CE

10. Which two statements are true about the AAM isolation detection feature? (Choose two.)

- A. All agents are responsible for isolation detection.
- B. Only primary agents are responsible for isolation detection.
- C. If, within half of the minimum detection time, no heartbeats are received, a ping is sent to each isolation address.

D.If, within half of the minimum detection time, no heartbeats are received, a ping is sent across the verification line.

Answer: AC

11.An administrator creates five Resource Groups in AAM. What is the number of ftPerl processes running by default?

- A.1
- B.2
- C.3
- D.5

Answer: C

12.Which two tasks can occur on a secondary agent? (Choose two.)

- A.execute rules
- B.restart the backbone
- C.host a Resource Group
- D.monitor the AAM domain
- E.maintain a copy of the database

Answer: CD

13.Which statement about AAM's Network Interface Card (NIC)-to-NIC feature is true?

- A.If one NIC fails, another will be configured to take its place.
- B.Communications can be routed from one NIC to another NIC.
- C.If one NIC is overloaded, another NIC will be configured to assist with traffic.
- D.Two NICs are paired together as a single logical NIC with twice the capacity and function.

Answer: A

14.When considering the use of a dedicated Mirroring Network, which two statements are true? (Choose two.)

- A.You must set the duplex mode for the adapter to AutoSelect.
- B.The NetBEUI protocol must be enabled for the mirroring network.
- C.You must ensure that TCP/IP is the only network protocol on that link and all other protocols are disabled.
- D.The Network Interface Card (NIC) used for mirroring must appear before the NICs used for the public network.
- E.You must assign a static IP address for the dedicated link that is on a separate subnet from any domain network or public network.

Answer: CE

15.Which statement is true about AAM secondary nodes?

- A.Secondary nodes provide backbone fault tolerance.

- B.Secondary nodes can be the last running node in an AAM domain.
- C.Secondary nodes can be the preferred node to run a Resource Group.
- D.Secondary Rule Interpreters can run rules for any node on the domain.

Answer: C

16.Node alias names must _____. (Choose two.)

- A.be unique
- B.be listed in DNS
- C.be fewer than 16 characters
- D.disable NetBIOS over TCP/IP
- E.be assigned to a Resource Group

Answer: AC

17.What does the mirroring for Windows 2000 Data Source require?

- A.a dynamic disk
- B.a private network
- C.a shared disk array
- D.a hardware RAID controller

Answer: B

18.Which three resource objects can be contained within a Resource Group? (Choose three.)

- A.rule
- B.process
- C.IP address
- D.Utility process
- E.Network Interface Card (NIC)

Answer: BCD

19.Which three options can only be defined in a Resource Group? (Choose three.)

- A.delays
- B.scripts
- C.event messages
- D.environment variables
- E.Network Interface Cards (NICs)

Answer: ABC

20.Which statement describes an AAM Utility Process?

- A.A Utility Process runs using the account of the user that started it.
- B.A Utility Process can transition to the failed state if its existence monitor is incorrectly written.
- C.A Utility Process is an unmanaged process that can be started from the Management Console, from a

Resource Group, or from a rule.

D. When contained within a Resource Group, a Utility Process will typically run while the group is brought online, and be stopped when the resource group is taken offline.

Answer: C

Visualexams.com was founded in 2006. The safer,easier way to help you pass any IT Certification exams . We provide high quality IT Certification exams practice questions and answers(Q&A). Especially Adobe, Apple, Citrix, Comptia, EMC, HP, HuaWei, LPI, Nortel, Oracle, SUN, Vmware and so on. And help you pass any IT Certification exams at the first try.
