Latest Version

We are constantly reviewing our products. New material is added and old material is revised. Free updates are available for 90 days after the purchase. You should check your member zone at VisualExams and update 3-4 days before the scheduled exam date.

Here is the procedure to get the latest version:

1. Go to <http://www.visualexams.com/>
2. Log in the **User Center**
3. The latest versions of all purchased products are downloadable from here. Just click the links.

Feedback

If you spot a possible improvement then please let us know. We always interested in improving product quality.

Feedback should be send to Visualexams@hotmail.com. You should include the following: Exam number, version, page number, question number, and your login Account.

Our experts will answer your mail promptly.

Explanations

This product does not include explanations at the moment. If you are interested in providing explanations for this exam, please contact Visualexams@hotmail.com.

Features

- Comprehensive questions with complete details
- Instant Downloadable in PDF form.
- Verified Answers Researched by Industry Experts
- Questions accompanied by exhibits.
- Drag and Drop questions as experienced in the Actual Exams.
- These questions and answers are backed by our GUARANTEE.
- Questions updated on regular basis.
- Like actual certification exams our product is in multiple-choice questions (MCQs)

Commitment to Your Success: At VisualTestExam.com, we are committed to your ongoing success. Our exams and questions are constantly being updated and compared to industry standards.

Want to earn a Microsoft certification like MCSE, MCSE 2003, CCNA, CCNP? Thinking about getting an A+ or CCSP?

A, CCSP or Network+ Certification with less effort and time. You will be astonished at the theoretical and practical knowledge you will acquire in such a short period of time using our Certification Training Products. Our Study material will enable you to pass your Microsoft, Your Cisco and any other certification on the very first attempt.

Guarantee

Visualexams provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if somehow you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

1. An unwanted tape pool cannot be deleted until the tapes in that pool are all _____.

- A. write-protected
- B. marked as recyclable
- C. removed from the tape library
- D. removed from the media database

Answer: D

2. Which NetWorker database tracks information for each file in a save set?

- A. media database
- B. Client File Index (CFI)
- C. savegroup completion report
- D. the /nsr/index/* files on the NetWorker client that created the save set

Answer: B

3. What is the purpose of the NetWorker Staging resource?

- A. configures the disk space used on the NetWorker Server for adv_file type devices
- B. repacks tape volumes containing deleted or expired save sets as well as demultiplexes the remaining save sets
- C. maintains free space on file/adv_file type devices by automatically moving save sets when parameters are met
- D. configures NetWorker HSM functionality to allow clients to transparently archive and stage data based on access time

Answer: C

4. What is the Backup Command attribute in the client configuration for a scheduled backup of a Microsoft SQL database?

- A. sqlsave
- B. sqluasm
- C. nsrsqlsv
- D. save -n sql

Answer: C

5. A company has a failed group backup and the system administrator wants to run the probe to see which filesystem on the client is backed up. Which command probes the clients?

- A. savegrp -s oboe -S Default
- B. savegrp -s oboe -p Default
- C. savegrp -s oboe -w Default
- D. savegrp -s oboe -v test Default

Answer: B

6. What is a proper method of determining the tape drive order before configuring a tape library?

- A. use the autodetect option of jbconfig
- B. put a tape in one drive and use mt to check status of that drive
- C. use psstat to get the order of drives and correlate it with inquire output
- D. use /usr/ccs/bin/what on the logical drive and correlate it with inquire output

Answer: B

7. Client flute is backed up to a file type device connected to the storage node orange. What happens when the file type device runs out of space during the backup?

- A. The backup fails, is restarted, and uses the next available device.
- B. The volume is marked full and the save set spans another volume.
- C. The backup is suspended and waits for the administrator to clear space.
- D. The backup is suspended, expired save sets are deleted, and the backup continues if enough space is cleared.

Answer: B

8. What is the primary purpose of the group resource?

- A. defines the schedule for a group of clients
- B. defines the start time for a group of clients
- C. defines the save sets for a group of clients
- D. defines the backup level for a group of clients

Answer: B

9. A jukebox has three drives. There is one appendable clone volume available. An automatic backup with cloning has just completed and the cloning operation is also complete. You are asked to clone a save set from the completed backup. You mount the clone volume and the original volume, then start the clone operation. The clone stops and asks for one writable clone volume. What is wrong?

- A. The clone volume is full.
- B. The save set spans volumes.
- C. The clone volume has an earlier instance of the save set.
- D. The source volume has an earlier instance of the save set.

Answer: C

10. A save set with SSID 12858282828 is about to end its retention period. Which command marks this save set as retained and browsable until January 12, 2010?

- A. nsrim -S 12858282828 -e 1/12/2010 -w 1/12/2010
- B. nsrmm -S 12858282828 -e 1/12/2004 -w 1/12/2010
- C. nsrmm -S 12858282828 -e 1/12/2010 -w 1/12/2010
- D. nsrjb -S 12858282828 -e 1/12/2010 -w 1/12/2010

Answer: C

11. Which attribute determines the maximum number of save sets allowed to back up simultaneously in a data zone?

- A. target sessions
- B. max parallelism
- C. client parallelism
- D. server parallelism

Answer: D

12. Which command do you use to recover a Client File Index (CFI)?

- A. mmrecov
- B. nsrck -L7
- C. scanner -m
- D. nsrinfo -N

Answer: B

13. Which utility generates reports about the contents of a Client File Index (CFI)?

- A. nsrck
- B. mminfo
- C. nsrrpt
- D. nsrinfo

Answer: D

14. Which statement about a single physical host is correct?

- A. It can only have one client resource configured.
- B. It can have more than one client resource configured.
- C. It can have more than one client resource configured, each with a unique name.
- D. It can have more than one client resource configured, and a client connection license must exist for each client resource.

Answer: B

15. Which three attributes can you extract using mminfo? (Choose three.)

- A. save time
- B. record number
- C. volume identifier
- D. volume subscript
- E. contents of the Client File Index (CFI)

Answer: ABC

16. Which two items does the inquire command display? (Choose two.)

- A. speed of tape devices, if installed
- B. SCSI address of connected devices
- C. media capacity of connected tape drives
- D. device file information of tape devices, if installed

Answer: BD

17. The retention policy for a large NetWorker client is increased from six months to one year. Backups are written to tape nightly and all tapes (except for cloned tapes) must remain in the tape library at all times. The number of files on this client that are backed up each night remains unchanged. What are three possible impacts of this change? (Choose three.)

- A. Additional tape media is needed.
- B. Another NetWorker server is needed.
- C. The media database increases in size.
- D. The capacity of the tape library is exceeded.
- E. The Client File Index (CFI) increases in size.

Answer: ACD

18. After marking files with nwrecover or winworkr, you click on Required Volumes to see which volumes are required. Which statement is true for the Required Volumes?

- A. NetWorker prepares the files list from the media database.
- B. NetWorker prepares the volumes list from the media database.
- C. NetWorker prepares the files list from the Client File Index (CFI).
- D. NetWorker prepares the volumes list from the Client File Index (CFI).

Answer: B

19. Which command-line utility displays a list of tapes in a tape library that is connected to the same server on which the command is invoked?

- A. nsrjb -l
- B. nsrjb -C
- C. nsrim -j
- D. nsrmm -C

Answer: B

20. Which two interfaces can be used to set up a NetWorker client? (Choose two.)

- A. nwadmin
- B. nsradmin
- C. nwbackup
- D. nsrwatch

Answer: AB

Visualexams.com was founded in 2006. The safer,easier way to help you pass any IT Certification exams . We provide high quality IT Certification exams practice questions and answers(Q&A). Especially Adobe, Apple, Citrix, Comptia, EMC, HP, HuaWei, LPI, Nortel, Oracle, SUN, Vmware and so on. And help you pass any IT Certification exams at the first try.
